Weight of Cattle—To Compute	26

Fleming's Vest-Pocket Veterinary Adviser

Fleming's Veterinary Remedies, though there are several of them, do not afford a suitable treatment for all ailments of horses and cattle. With a view to rendering farmers all the assistance we can in the treatment of their ailing stock, and also with a view to setting forth clearly and adequately the uses and limitations of our own remedies, we have published Fleming's Vest-Pocket Veterinary Adviser. This book contains 192 pages, 69 illustrations, and is durably bound in leatherette. It covers over two hundred veterinary subjects, describing diseases so that you will know how to recognize them by their symptoms, telling you their nature and cause, and what you should do to cure them. The illustration on the back cover of this almanac

will afford you a fair idea as to what the book looks like. We believe it is the best veterinary book ever published to meet the needs of the average farmer, and will gladly mail a copy free of charge to those who believe it would be helpful to them and will write for it.

Because Fleming's Vest-Pocket Veterinary Adviser describes nearly all the diseases of horses and cattle so fully and clearly and may be had for the asking, we shall not take space in this almanac to describe even the diseases that our remedies cure. Instead, we shall describe very briefly the remedies themselves, and devote the major portion of available space to the publication of letters that will afford the reader a fair idea as to the kind of work they do.

The Twelve Signs of the Zodiac

Ram, Aries—Head

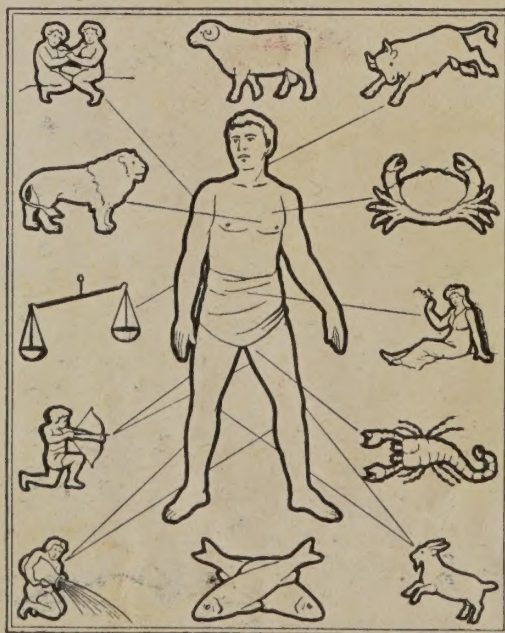

Twins, Gemini
Arms

Lion, Leo

Fleming's Farm and Live Stock Almanac

With the publication of Fleming's Farm and Live Stock Almanac, an entirely new form of almanac calendar is presented to the public.

Heretofore one almanac has been about as good as another, because all have been practically alike in the make-up of their calendar pages, and it is probable that the first almanac ever printed was just like most of the almanacs of today.

Our purpose was to make this an almanac that would show at a glance just what a person would want to know about any day in the year, and when we outlined our plan for the calendar pages to Prof. L. J. Heatwole, Almanac Calculator and Co-operative Observer U. S. Weather Bureau, whom we engaged to make the astronomical calculations for us, he expressed his opinion as follows: "Allow me to state that I admire the originality that is set forth in your proposed calendar. With all my twenty years' experience as a calculator, I have as yet not come across so unique and practical a plan for getting out an almanac as the one you now have in hand."

The Calendar Explained

The form of calendar used in this almanac is so plain and simple that one could hardly fail to understand it, even if no explanation were given. You will readily observe that the general form is the same as that commonly used for ordinary hanging calendars, and that each day has a space to itself.

The number occupying the upper left-hand corner denotes the day of the month, and to the right of it is shown the ruling sign of the Zodiac. (See chart on inside of front cover.) The hands upon the dial at the right indicate the time of sunrise, and the dial at the left shows the time of sunset.

The dial at the bottom of the space represents the twelve hours beginning at six o'clock in the evening and ending at six o'clock the next morning. The light part of this dial shows the hours of moonlight, and the shaded part shows the hours of darkness. Thus it may be seen at a glance just what part of the night will be lighted by the moon on any date of the year.

Latitude and Time

The astronomical data given in this almanac is adapted to the parallel of latitude extending across the United States in approximate line with Newport, R. I.; Wilkesbarre, Pa.; Cleveland, Ohio; Joliet, Ill.; Des Moines, Iowa; Omaha, Neb.; Cheyenne, Wyo., and Salt Lake City, Utah, and in other latitudes will be slightly inaccurate according to distance north or south

(Continued on page 3.)

Fleming's Famous Live Stock Remedies

The word "famous" has often been misapplied by those who have had something to sell.

Nothing is truly and honorably famous until it has become widely known as a doer of good works.

We believe we may say, in truth and reasonable modesty, that Fleming's Veterinary Remedies have attained fame. They have proved their merit and are favorably known to farmers of every state, territory and province in this country and Canada, and owners of live stock are richer by millions of dollars than they would have been without them.

Conservers of Wealth

There are two reasons why Fleming's Remedies have been and are remarkable conservers of wealth.

The first reason is that, for the most part, they are for serious ailments that have been considered incurable, and that result in death of the animal or loss of the greater part of its value unless cured.

The second reason is that they actually do cure—even bad old cases that look hopeless to good veterinarians. Farther on you will find proof of that, and we have enough such reports to make volumes if they were put into print.

As you read the letters published in this almanac you will see how Fleming's Remedies have made live stock owners richer, but can scarcely form an adequate idea of the vast total saving, because these are only a few instances out of tens of thousands. Fleming's Fistula and Poll Evil Cure alone cures, as near as we can estimate, about ten thousand horses a year. One horse cured with it, after being given up by several doctors, sold for six hundred dollars. Elsewhere we publish a letter from the man who owned this horse, himself a physician.

We know of a fine bull valued at one thousand dollars that was saved by Fleming's Lump Jaw Cure, and at least two of our customers have reported curing more than a hundred cases in succession without a single failure.

A man in Cleveland, Ohio, owned a fine pacing horse that was practically helpless on account of a bone spavin. Treatment, supposedly the best obtainable, had failed completely, and it was recommended that the horse be shot. By investing two dollars in a package of Fleming's Spavin and Ringbone Paste, the owner cured the horse himself and sold him for eight hundred dollars.

The record instance of saving made by Fleming's Spavin Cure (Liquid), as far as we have been informed, was a fine Kentucky stallion valued at one thousand dollars, unsalable and almost worthless before treatment owing to a bad thoroughpin.

Of course, curing a fine animal is no better evidence of merit in a remedy than is the curing of one of more moderate value, and we mention the above instances merely to show how large the saving may sometimes be in an individual case, and how vast a contribution to the welfare of the live stock industry may be made by a few veterinary remedies of real worth.

Not Infallible

We do not say that Fleming's Remedies never fail to cure. Such a statement would be absurd, because there is no infallible remedy of any kind for any disease. Death follows life as a natural sequence, and such a remedy is impossible because contrary to the established order of things.

Our claim is that they do not fail often—that they will usually cure if given any kind of a reasonable chance.

Our belief is that each is the best thing that can be used for the purpose or purposes for which we recommend it—that it affords a better chance to cure than anything else that might be employed, regardless of what the other thing is or what it costs.

What We Do When They Fail

When a man buys a pair of shoes he knows that he is going to get some wear out of them—that he is getting at least a part of his money's worth. It is the same with any ordinary article of merchandise.

Not so when the thing purchased is a medicine. No matter how good a medicine it is, it may fail to cure or even benefit the particular case that he treats with it. True, if it cures it will have been worth ten, fifty or even a hundred times the amount he paid for it, but if it does no good it will have been worth nothing at all to him. Considering that both odds and chances are in his favor, as they are when he buys one of Fleming's Remedies, it is probably the fairest kind of a gamble known, nevertheless we have a way of eliminating the gamble from the customer's side of the transaction.

It is impossible to make a remedy that will surely cure every time, but altogether possible to make remedies that will fail so seldom that they can safely be guaranteed.

That is what we have done. If a man buys one of Fleming's Remedies, he is to get his money's worth or his money back. If he gets a hundred times his money's worth, we are all the more pleased, and it costs him nothing extra.

Getting one's money's worth may or may not mean a complete cure. It depends upon the kind of disease that is being treated. For instance, there is little use in benefiting a case of Lump Jaw and not curing it. The same is true of Fistula and Poll Evil. Money's worth in such cases means a cure. On the other hand, an incurable case of Heaves might easily be benefited to an extent worth far more than the cost of the remedy.

The customer is to be the judge, as you will see by reading our guarantee on the inside of the back cover of this almanac. He is to decide

whether or not a remedy purchased from us has been worth to him the price he paid for it, and if it has not we will return the money.

Of course, as a matter of common fairness, he is expected to write, fully describing any case that does not progress favorably within a reasonable time, and if in the end the treatment is not satisfactory he should not wait a year or two before letting us know about it.

Our purpose is to satisfy every customer, and to that end we offer a guarantee that is genuine. It expresses in a few words our whole business policy. We believe it the first real guarantee ever placed upon a line of veterinary remedies, and whether or not it remains the only one to-day, we are not in position to answer.

A Fair Chance

Because our guarantee is positive and to the point, some get the mistaken idea that a single bottle or package is always a conclusive test—that if the case is not cured by that quantity the remedy has had a fair chance, has proved a failure, and a refund is in order.

That matter depends entirely upon the kind of ailment that is being treated. For instance, you would never use as much as a whole bottle of Fleming's Spavin and Ringbone Paste upon one blemish, but a case of Fistula or Poll Evil might require all the way from a part of a bottle to several bottles of the Fistula and Poll Evil Cure. In either event, a cure would be worth far more than the money spent, and our guarantee assures you of your money's worth or your money back. Along with the price list on inside of back cover we give as accurate information as we can concerning the probable quantity needed.

For Farm Use

Fleming's Remedies are used more and more by veterinarians in their practice. You will observe that some of the letters printed are from men of the profession. Our efforts, however, have always been directed toward interesting the farmer who, either from choice or necessity, treats his own stock. To him we know that we can render assistance such as is not afforded by any other veterinary medicines. Our remedies are especially suited to his needs. They are all easy to use, regardless of the fact that several of them are for the cure of serious and very formidable diseases. The directions we supply are so complete and so plain that after reading them over he will be able to proceed with the treatment like one well experienced.

Another reason why our remedies are especially helpful to farmers is because we can send them by mail to all parts of the country, wherever the mail service extends. In this way remote rural districts are reached with almost the same readiness as those adjacent to cities. In hundreds of such localities there is no veterinarian available, and it is not uncommon to receive orders from people who tell us that they would have to travel from twenty-five to fifty miles to reach even a drug store.

(Continued from page 1)

of this parallel. Such inaccuracy, however, exists in all almanacs, and is of slight importance within the territory in which the almanac is usually distributed.

In this almanac the calculations are given according to the apparent motion of the real sun; in other words, according to solar time. Consequently, the data given is applicable alike to Eastern, Central and Western states, excepting the moon's changes, for which the time is given separately at the bottom of the calendar pages.

The Year 1909

The year 1909 comprises the latter part of the 133d and the beginning of the 134th year of American Independence.

The year 5670 of the Jewish era begins at sunset on September 15th.

The year 1327 of the Mohammedan era begins on January 23d.

January 1, 1909, is the 2,418,308th day since the beginning of the Julian Period.

The planet Mars is Morning Star until September 24th, and then Evening Star to the end of the year.

(Continued on page 4)

Fleming's Lump Jaw Cure

This remedy is for the disease of cattle commonly known as Lump Jaw, a specific germ disease technically called Actinomycosis. For a full description of Lump Jaw and illustrations showing the different types of cases, we refer you to Fleming's Vest-Pocket Veterinary Adviser.

Fleming's Lump Jaw Cure stands practically alone as a cure for Lump Jaw. We began selling it more than twelve years ago, and each year the demand for it has grown. A score or more of Lump Jaw remedies have since been offered, some of them rank imitations of ours, but none has ever attained any sale to speak of, and one after another has been withdrawn from the market.

In order to survive, a remedy of this kind must have exceptional merit. A person might take a medicine for liver complaint and imagine that it helped him, but there is no chance for imaginary results when he treats an animal for Lump Jaw. The remedy cures or it doesn't cure, and there can be no mistake as to which of the two it does.

You Must Cure Lump Jaw

Lump Jaw does not cure itself. You must cure it or lose the animal.

We believe there is nothing else so sure to cure as Fleming's Lump Jaw Cure.

Even if the case is old and bad, one bottle will likely be enough. It is very seldom that more is needed, and most cases are cured with less than a bottle.

You can scarcely afford not to use it, because the chances are all in your favor.

If it cures you will have saved many times its cost. If it doesn't cure we will return your money.

Fleming's Lump Jaw Cure.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Size of a Jug

Dear Sirs:—Some time ago I purchased a bottle of your Lump Jaw Cure and it did the work fine. Two applications cured the heifer. The lump was the size of a half-gallon jug, but came off as smooth as the palm of your hand.—D. B. McDonell, Lincoln, Minn.

Didn't Expect a Cure

Gentlemen:—Your remedy for Lump Jaw has done the work and the cow is cured. I had no expectation of such a result. Instead I thought I would have to call on you for my money. This was a bad case, but it is cured and I am well satisfied.—J. A. Peasley, Worthington, Ohio.

Doctor Said, Kill Her

Dear Sirs:—I write to tell you that the cow on which I used Fleming's Lump Jaw Cure is all right. A veterinary surgeon of Canton, Pa., told me there was no cure for Lump Jaw and that we would have to kill the cow. I think he could learn some yet.—J. B. English, New Albany, Pa., R. F. D. No. 46.

Cured Eleven With One Bottle

Gentlemen:—I used your Lump Jaw Cure with fine results. Cured eleven head with one bottle, and some of these cases were very bad.—C. M. Blanchard, Kenmare, N. Dak.

Thought Lump Jaw Incurable

Gentlemen:—A year ago I had two cows that had Lump Jaw. I thought that this disease was incurable, but Mr. J. P. Tillman, a neighbor of mine, told me that he ordered one bottle of your Lump Jaw Cure and cured three head of cattle with it. Thinking that was pretty good, I ordered a bottle and, with two applications on each case, I cured them both sound and well, then cured another case for a neighbor. I will recommend this remedy to all.—R. M. Stepp, Manchester, Tenn.

Twenty Lumps

Dear Sirs:—About two years ago I got a bottle of Fleming's Lump Jaw Cure. I had a number of head of cattle with lumps on their jaws. There were twenty lumps in all, and the one bottle cured them all up in good shape. One of my neighbors, Mr. F. B. Arnest, had a steer with a large lump on its jaw. I told him about the remedy. He ordered a bottle and it did the work. Enclosed find \$2.00 for a bottle of Fistula and Poll Evil Cure.—L. F. Reigle, New London, Ohio, R. F. D. No. 5.

Cured All Six

Gentlemen:—Your Lump Jaw Cure has cured six cattle for me. One bottle cured all six.—G. S. Deakins, Rowlesburg, West Va.

Cures Permanently

Dear Sirs:—Four years ago I bought a bottle of your Lump Jaw Cure and tried it on two cases of Lump Jaw. It cured both cases sound. One was a steer and I sent him to market with the others. The other was a milch cow and I have her here now. There has been no sign of the disease in the four years.—G. B. Sanders, Max Meadows, Va.

A Good Neighbor

Gentlemen:—I ordered a bottle of Lump Jaw Cure and it cured my cow. Then I let two of my neighbors take what was left and each cured a case with it. I believe it will do just what you say.—R. V. Andres, R. F. D. No. 2, Greensboro, N. C.

Every Bottle Gave Satisfaction

Dear Sirs:—For the enclosed draft please send me one bottle of Fleming's Lump Jaw Cure. This is the tenth bottle I have bought of you and all have given satisfaction.—J. P. Chilton, R. F. D. No. 2, Chandlerville, Ill.

Could Get Only \$5.00

Gentlemen:—In the early part of 1903 I had a thoroughbred black Polled Angus heifer, two years old, with a bad case of Lump Jaw. Having sacrificed several cattle in former years from the same cause and every one saying there was no cure, I thought I would get rid of her as quick as possible, so offered her for sale. Five dollars was the most I could get. She was a very fine animal in every other respect, and had cost a good round sum. I concluded to try your Lump Jaw Cure and two applications cured her completely. I still have her and she is a valuable cow. Should I again need anything in the veterinary line, I will surely write to you.—B. H. Barnes, Oak Farm, Churchville, Md.

Sold For Full Price

Gentlemen:—I shipped three head of steers to the Chicago market which had been successfully

cured by your Lump Jaw Cure. They brought me full price.—Anton Tedson, Dupuyer, Mont.

One Bottle Saved \$200

Gentlemen:—Please send me bottle of Fleming's Lump Jaw Cure for the money order enclosed. I have just finished the bottle I got from you some time ago and I consider it the best medicine I ever saw used among stock. The one bottle saved me two hundred dollars' worth of cattle. It works like a charm and is simple to use. I would not be without it at any price.—S. E. Roberts, Tullos, La.

Brought More Than The Others

Dear Sirs:—I sold nineteen head of steers for \$42 a head. Another two-year-old steer had Lump Jaw and the best they would offer for him was \$12.50. I sent for a bottle of your Lump Jaw Cure, and two months later he was well and I sold him for \$48.80. You can easily figure what the one bottle saved for me.—James A. Stewart, R. F. D. No. 1, Revere, Mo.

Not a Single Failure

Dear Sirs:—Find enclosed \$5.00 for medicines as stated on the order blank. I have used quite a good deal of your Lump Jaw Cure with splendid success; in fact, without a single failure.—James E. Hunter, R. F. D. No. 4, Louisburg, Kansas.

(Continued from page 3)

The planet Jupiter will be Morning Star until February 28th, then Evening Star until September 18th, after which date he will be Morning Star to end of year.

The planet Saturn is Evening Star until April 3d, after which date it is Morning Star until October 13th, and then Evening Star the balance of the year.

Saturn is called the Ruling Planet for the year 1909

Eclipses

In the year 1909 there will be four eclipses; two of the Sun and two of the Moon.

The First is a Total Eclipse of the Moon: June 3d at 7 o'clock 36 minutes in the evening. Only partly visible here, as the Moon rises eclipsed. Visible in South America and Europe in the beginning, and ending in western South America and in North America.

The Second is a Central Eclipse of the Sun: June 17th at 5 o'clock 38 minutes in the evening. Visible here but as a partial eclipse, as the Sun sets eclipsed. Visible in North America, the North Polar regions, Greenland and northern and eastern Asia.

The Third is a Total Eclipse of the Moon: November 27th at 3 o'clock 2 minutes in the morning. Visible here. Visible generally throughout North and South America, western and southern Asia and Australia.

The Fourth is a Partial Eclipse of the Sun: December 12th at 12 o'clock 48 minutes in the afternoon. Invisible here. Visible to New Zealand and the South Polar regions.

Total Solar Eclipses for 45 Years

The total eclipses of the sun which will take place in the next 45 years will occur as follows: 1912, total in Paris; 1914, total in Russia and Sweden; 1916, total in the Caribbean Sea; 1919, 1921, 1922, 1925, total in the United States; 1927, total in England and Sweden; 1936, total in Greece, Turkey and the Black Sea; 1945, total in Canada, Greenland, Lapland and Northern Russia; 1952, total in Guinea and Red Sea to Central Asia; 1954, total in Sweden and Russia.

A Month Without a Full Moon

During the month of February, 1866, there was no full moon, the like of which had not occurred

Fleming's Fistula and Poll Evil Cure

This is in two ways a wonderful remedy. It is wonderfully successful, and wonderfully simple to use.

There is probably nothing uglier than a bad case of Fistula or Poll Evil.

Plenty of people will tell you that there is no cure for either disease. Others, even veterinarians of widely noted ability, believe that surgery is the only hope—that the knife must explore and dissect out the diseased parts.

Considering this, isn't it worthy of a little wonder that Fleming's Fistula and Poll Evil Cure, in the hands of inexperienced persons, cures even cases of the worst type without any cutting at all?

This, too, with only a few minutes' attention every fifth day, and without the use of antiseptic lotions or anything other than the remedy itself.

Fleming's Fistula and Poll Evil Cure is successful not occasionally, but usually. It cures approximately ten thousand horses each year, and the failures reported average less than five to each hundred cases treated.

About 85 per cent. of the cases are cured with one bottle or less. A few are tedious, but a cure is worth more than the cost of several bottles, provided several are needed. As a general rule, there is little or no improvement apparent until the disease is practically eradicated and the right condition for healing has been established. For that reason, one should not become discouraged too soon. It is to the customer's interest, more than our own, to cure the horse. He is the one to whom a cure means the greatest saving, and in his attempt to cure he is not risking loss of the money the remedy costs.

Where a difficult case is encountered, we expect that the customer will write, giving us full particulars before abandoning treatment, but we will not insist upon unreasonable perseverance. Just how long a trial is a fair trial cannot be told. It depends upon the history and condition of the case being treated. We are always glad to advise, but the customer is the judge, and whenever he feels that it is justifiable to give the case up, we are ready to refund his money.

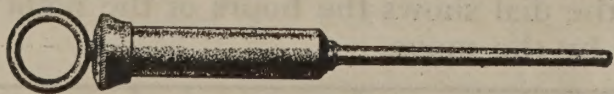

Fistula and Poll Evil are described at length in Fleming's Vest-Pocket Veterinary Adviser. If you haven't a copy, ask us for one.

Fleming's Fistula and Poll Evil Cure.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Fleming's Fistula Syringe

This syringe is especially designed for applying Fleming's Fistula and Poll Evil Cure in advanced cases of Fistula and Poll Evil. Either disease may be successfully treated without it, but the work is easier done and results may be

more prompt when it is used. It is especially helpful in the bad old cases where the pipes are deep, and where the discharge of pus is considerable, indicating that much tissue is diseased. These syringes are made to order for us, and the pipe or nozzle is three inches in length, so that it will reach well down into the opening. The pipes are detachable, and extra ones can be supplied in case of breakage.

Complete Syringe, by mail, 50 cents.

Extra Nozzles, each - 20 cents.

BEATRICE VETERINARY INFIRMARY,

Wimsett Bros., Proprietors,

Beatrice, Neb.

Fleming Bros., Union Stock Yards, Chicago.

Dear Sirs:—Please find check enclosed for \$2 for a bottle of your Fistula and Poll Evil Cure. We have been using this remedy very successfully in our practice here. It is easy to apply and gives good results. We expect to use it right along. Most veterinarians are prejudiced against such remedies, but we believe in looking after success.

Yours truly,

WIMSETT BROS.

U. B. REYNOLDS, D. V. S.

Veterinary

Physician and Surgeon,

Cynthiana, Ind.

Fleming Bros., Union Stock Yards, Chicago.

Gentlemen:—The bottle of Fistula and Poll Evil Cure I purchased from you last fall proved a great remedy in the treatment of those diseases. Please send me another bottle, as I think there is nothing like it.

Respectfully yours,

U. B. REYNOLDS, D. V. S.

J. W. KESTER, M. D.

U. S. Pension Surgeon Examiner

Surgeon of the Chicago, Milwaukee &

St. Paul Railway Company,

Mazomanie, Wis.

Fleming Bros., Chicago, Ill.

Gentlemen:—Although I am an M. D. of over twenty years' practice, a graduate of Rush Medical College, this is the first testimonial I have ever given for a patent or proprietary medicine. I was the owner of a highly bred trotting mare that was afflicted with Poll Evil. Knowing something about horses and their diseases, and by the aid of three veterinarians, I treated this mare daily for nine months without effecting a cure. In despair I obtained one bottle of Fleming's Fistula and Poll Evil Cure, and effected a complete cure in three weeks, without any stiffening or disfigurement of head or neck. I used the medicine with a hard rubber syringe that would follow a sinus six and one-half inches in depth.

Respectfully,

J. W. KESTER, M. D.

P. S.—I have since sold this mare for \$600.

Cured 17 Cases

Gentlemen:—I have used your Fistula and Poll Evil Cure for about four years and have had good results so far. I have cured 17 cases out of 19, but the two have not got the better of me yet, and I am still treating them. They are very bad and on one of them I have used three bottles. Will write you later as to how it comes out.—Peter O'Brien, Bazine, Kansas.

Vertebra Decayed

Dear Sirs:—I can say that your Tonic Heave Remedy has no equal as a tonic and flesh builder for horses; also, that your Fistula and Poll Evil Cure is a success. I bought a mule with Poll Evil and took her to a veterinarian. He examined her and said the third vertebra was decayed and there was no cure for her. One bottle cured this mule and a case of Fistula besides. That was eighteen months ago and they are all right yet. Am now treating another case of Fistula, the worst I ever saw, and have it just about well. It broke in at least a dozen different places.—J. W. Riley, Gracey, Ky.

From Monadnock Farms

Dear Sirs:—I thought it might be of interest to you to know that about two years ago I got a bottle of your Fistula and Poll Evil Cure. Half of it did the work, and I let one of my neighbors have the rest of the bottle. I saw him a few days ago and he said it was a success.—Burton Shay, Monadnock Farms, Monadnock, N. H.

Big Expense and No Cure

Dear Sirs:—The Fistula and Poll Evil Cure which you sent me a long time ago did its work as you said it would. When I sent for it I had little faith in it, as I had taken my mare to Rochester two different times to one of the best veterinary surgeons there, and he failed. It cost me between \$35 and \$40 and I was no better off. I am glad to say that your remedy cured completely by using only half of the bottle. I consider it was worth to me the price of my mare.—William Burger, Hilton, N. Y.

The Dealers Convinced

Dear Sirs:—My horse had a bad Fistula and two dealers in horses told me I could not cure him. After using half a bottle of your Fistula and Poll Evil Cure, he was completely cured. I gave the remaining half bottle to one of these dealers this morning to use on a horse with a bad Fistula.—Fred K. Taylor, R. F. D., Epping, N. H.

Made \$130

Gentlemen:—Two years ago I bought a mare for \$5 which had Fistula. She had seven running pipes. I tried your Fistula medicine and it cured her. I sold her in the fall for \$135. Your medicines are all you recommend them to be.—Tom Dodson, Lexington, Ill.

Doctors Wouldn't Treat It

Dear Sirs:—Last February a mare of mine had both Fistula and Poll Evil in the very worst form. She was so bad that two veterinarians refused to take the case, and other parties told me I might just as well shoot her. I ordered a bottle of your remedy and it cured her entirely, and I still have some of it left. She has since raised me a fine colt, and I would not take \$225 for her today. I have handled horses all my life, having been in the livery business for eighteen years, and I can say that to any one having a horse with either Fistula or Poll Evil, your remedy is cheap at ten times the price.—Myron F. Baker, Kankakee, Ill.

One Bottle Cured Three

Gentlemen:—I have been doctoring horses for a number of years and your remedies beat anything I have ever tried. I bought a four-year-old horse last spring with a Poll Evil for \$20. There were five openings on top of the head and I made two more with a knife, then used a force pump to clean the pus out of his head. Your Fistula and Poll Evil Cure cured him sound, and I have been offered \$125 for him, and it was no temptation. I also cured two other cases with the same bottle.—Wesley Mattox, R. F. D. No. 30, Scotland, Ill.

Paid \$46 and No Cure

Dear Sirs:—I will tell you my experience with Fistula of the Withers. I had a little mare with Fistula, and I doctored her for seven months at an expense of \$46 without any benefit at all. I then sent for your Fistula and Poll Evil Cure and two treatments cured her just as sound as ever. Then I let a neighbor take the bottle and his horse is completely well now. His name is Ed Dryden.—G. C. Morrow, R. F. D. No. 1, Orange, Calif.

Cures Permanently

Gentlemen:—Your Fistula Remedy is a sure cure. Veterinarians said it would be only temporary, so I have waited over a year since the mare was cured, and she remains so. She is twenty-four years old and good yet. The first bottle failed because it was not properly applied. Then I ordered the second bottle and also ordered your Fistula syringe and the result was a cure. The

veterinarians told me to shoot her, but I thought her a good case to experiment on and am glad I did it.—Hugh Garvin, R. F. D. No. 1, Negley, Ohio.

Seemed Perfectly Rotten

Gentlemen:—Your Fistula and Poll Evil Cure has cured my mare sound and all right by using about two-thirds of a bottle. At one time I do not suppose I could have given her away. It seemed to me she was perfectly rotten. Her neck was, I think, eighteen inches thick. One could smell her before he got near her, and the black flies were around her thick. My neighbors said she would never be any account, but they do not say that now, for she is a picture. There is nothing that I ever saw equal to Fleming's Fistula and Poll Evil Cure.—A. A. Burris, R. F. D. No. 2, Conover, N. C.

Said He Must Die

Dear Sirs:—Last fall I advised a neighbor of mine to try your Fistula Cure after the veterinarian had given up his horse and said that he must die. He had no faith, but sent for a bottle anyway and in two months was working the horse. Today he is as sound as ever.—Perry Leslie, Northampton, N. Y.

Worked O. K.

Gentlemen:—Enclosed find money order for \$2.50 for a bottle of Fistula Cure and a Fistula Syringe. Our previous order did the work O. K. Cured two cases on which we had spent \$25 for veterinary fees and no results. The animals have been at work all summer. Please send another copy of your Veterinary Adviser.—Buckner & Short, Mules, Horses and Live Stock, Springhill, Tenn.

Had It Three Years

Gentlemen:—In December, 1906, I ordered a bottle of your Fistula and Poll Evil Cure. Half of it cured my horse which had had Fistula for three years and was pronounced incurable by all who knew him, except a local veterinarian who doctored him the preceding summer to no purpose whatever. The horse is now at work almost every day.—Arthur E. Gardner, R. F. D. No. 3, Canaan, N. H.

Had Been Doctored 18 Months

Dear Sirs:—I bought a bottle of your Fistula and Poll Evil Cure about a year ago and cured a horse of mine which had been doctored for eighteen months by a man noted for curing Fistula. Neighbors wanted me to kill the horse, but your medicine cured him in five weeks, and I would not take \$175 for him now. I have twenty-three head of horses, and the one I cured is the best work horse I have.—A. M. Dearth, R. F. D. No. 2, Secor, Ill.

Made Him \$95

Dear Sirs:—I tried your Fistula Cure and it proved satisfactory to me. It cured a mare that I had offered to sell for \$5 and that afterward sold for \$100. Veterinarians had failed to cure her.—J. R. Paxton, Moffatts Creek, Pa.

A Large Cavity

Dear Sirs:—Your Fistula medicine cured my horse after a hole had rotted out until I could stick my hand down in it. He was not worth a dollar when I got the medicine, but I sold him for \$100.—A. J. Burton, R. F. D. No. 1, Gray, Okla.

Simple to Use

Gentlemen:—A fine horse of mine valued at \$300 had Fistula, there being about fifteen pipes discharging. I cured him with one bottle of Fleming's Fistula Cure, and cannot praise the remedy too much in the wonderful work it did, and I found it so simple to use. I give my heartiest thanks to your Fistula Cure.—Algie P. Gregg, Dickerson, Md.

Took Two Bottles

Dear Sirs:—I am so well pleased with your Fistula and Poll Evil Cure. My mare was not

worth \$2. It took two bottles of the remedy to cure her, but it would take \$200 today to buy her.—Frank Morgan, Longmont, Colo.

Doctor Had No Hope

Gentlemen:—I will tell you how my colt is getting along. She is all cured up sound. It was an awful bad case. Nobody ever thought I could get her cured, and they all said I would have to kill her. The veterinarian also said I would have to kill her. That Fistula and Poll Evil Cure is worth its weight in gold. I thank you for the good that it has done.—H. W. West, R. F. D. No. 1, St. Johnsbury, Vermont.

Cured a \$200 Mare

Dear Sirs:—I have used your Fistula medicine and cured a \$200 mare in twenty days after a horse doctor had failed. Enclosed find money order for \$2.00. Please send a bottle of the same remedy. It is for a neighbor and I have recommended it to him.—J. M. Wilson, R. F. D. No. 3, Gibson City, Ill.

Couldn't Walk Without Staggering

Dear Sirs:—I began using your Fistula Cure Oct. 21st. By Nov. 21st my horse was sound and well and I drove him for the first time in four months. He had been so bad that he could not get his head down to eat grass, could not lie down at night, and could not walk without staggering. I consider it a great remedy.—Rev. H. C. Morledge, Cumberland, Ohio.

Didn't Take Bad Advice

Gentlemen:—I believe that your Fistula and Poll Evil Cure is one of the greatest things on earth. My mare had Poll Evil so bad that everybody tried to get me to kill her, but three applications of the remedy effected a cure.—Clifton Clough, Walnut Prairie, Ill.

Doctors Gave No Hope

Gentlemen:—Last fall I sent to you for a bottle of Fistula and Poll Evil Cure and it cured the worst case of Fistula I ever saw. The veterinarians here advised me to destroy the animal, but I consider that she is now worth \$200. Many thanks to you for the cure. I have recommended the remedy to my neighbor, J. E. Pride, who has a mule that has had Fistula for two years. Enclosed find P. O. money order for \$2.00. Please mail the remedy to him.—J. W. McKnight, Paris, Texas.

Used Three Bottles

Gentlemen:—I had a mare with the worst case of Fistula I ever saw. I had horse doctors to try all they knew and they failed. I then thought I would try your remedy. Sent \$2.50 for one bottle and a syringe, but the openings were so large that the bottle did not go very far, so I sent for two bottles more and am pleased to say that my mare is cured sound and well. I can also say that the money I paid you was the best spent money that I ever paid out in my life, and I think that any one who will use your Fistula Cure properly will not want any money back.—Joseph Sheanshang, Grants Lick, Ky.

Doctors Refused the Case

Gentlemen:—I had a valuable horse that had Poll Evil just behind his ears, and two veterinarians refused to treat him. Another said he could cure him in six weeks, but treated him six months and he was just the same. Your Fistula and Poll Evil Cure was recommended to me by Mr. Cooley. With it I cured the horse by making only five applications.—Daniel A. Jacobs, R. F. D. No. 1, Whitefield, N. H.

Made Money for the Doctor

Gentlemen:—I bought a mare with a bad case of Fistula. The parties had treated her for a long time and could not cure her. She cost me \$13 and I paid \$2 for a bottle of your Fistula and Poll Evil Cure. I could sell her now for \$100, but won't take that. She has been well for eight months, and I drive her all the time.—H. G. Taylor, V. S., Hume, Mo.

First Offer, \$20; Second Offer, \$290

Dear Sirs:—I have a young mare weighing 1,600 pounds that had Fistula and had it bad on both sides. She was doctored for a year or more, but kept getting worse all the time. She got so poor that she was a mere skeleton. One of my neighbors was sending to you for some of your medicine, and he talked me into sending along for your Fistula Cure. I gave him the money and he ordered the medicine. It cured the horse slick and clean. That was two years ago and she is still cured. I do all kinds of work with her. I was offered \$20 for her before I used your remedy; this winter I was offered \$290.—W. V. Redmond, R. F. D. No. 1, Fort Collins, Colo.

(Continued from page 4)

within the world's history. Both January and March of the same year had two full moons, but February had none. Astronomers calculate that 2,500,000 years must now elapse before there can be another month without a full moon.

Weather Forecasting

It has been the custom of almanac publishers to attempt to foretell the weather changes for a year in advance. We do not believe, and we think our readers are too intelligent to believe, that these so-called forecasts are of any value, consequently none appear in Fleming's Farm and Live Stock Almanac.

The United States Government maintains an elaborate Weather Bureau, consisting of about one hundred and fifty Weather Stations equipped with the best meteorological instruments and in charge of trained meteorologists. These stations are scientifically situated, so as to cover the weather conditions of the entire country, and at stated hours observations are made and telegraphed to headquarters in Washington. With this great mass of weather data to guide them, the chief of the Weather Bureau and his assistants prepare forecasts for the different sections of the country. These forecasts are, for the most part, reliable, and of great value to the agricultural and general business interests of the nation.

Even with the almost perfect facilities of the Weather Bureau, and the vast experience of the persons in charge, no attempt is made to foretell the weather changes for more than forty-eight hours in advance, all of which goes to show that a set of forecasts made up for an entire year can be nothing better than mere guessing, and if any reader desires such forecasts, he is probably as competent to make them for himself as is any other person to make them for him.

Weather Indications

What is said about the unreliability of long-range weather forecasting, is no denial that an observing person may with considerable accuracy foretell impending changes, and the following general rules may be of help in this regard:

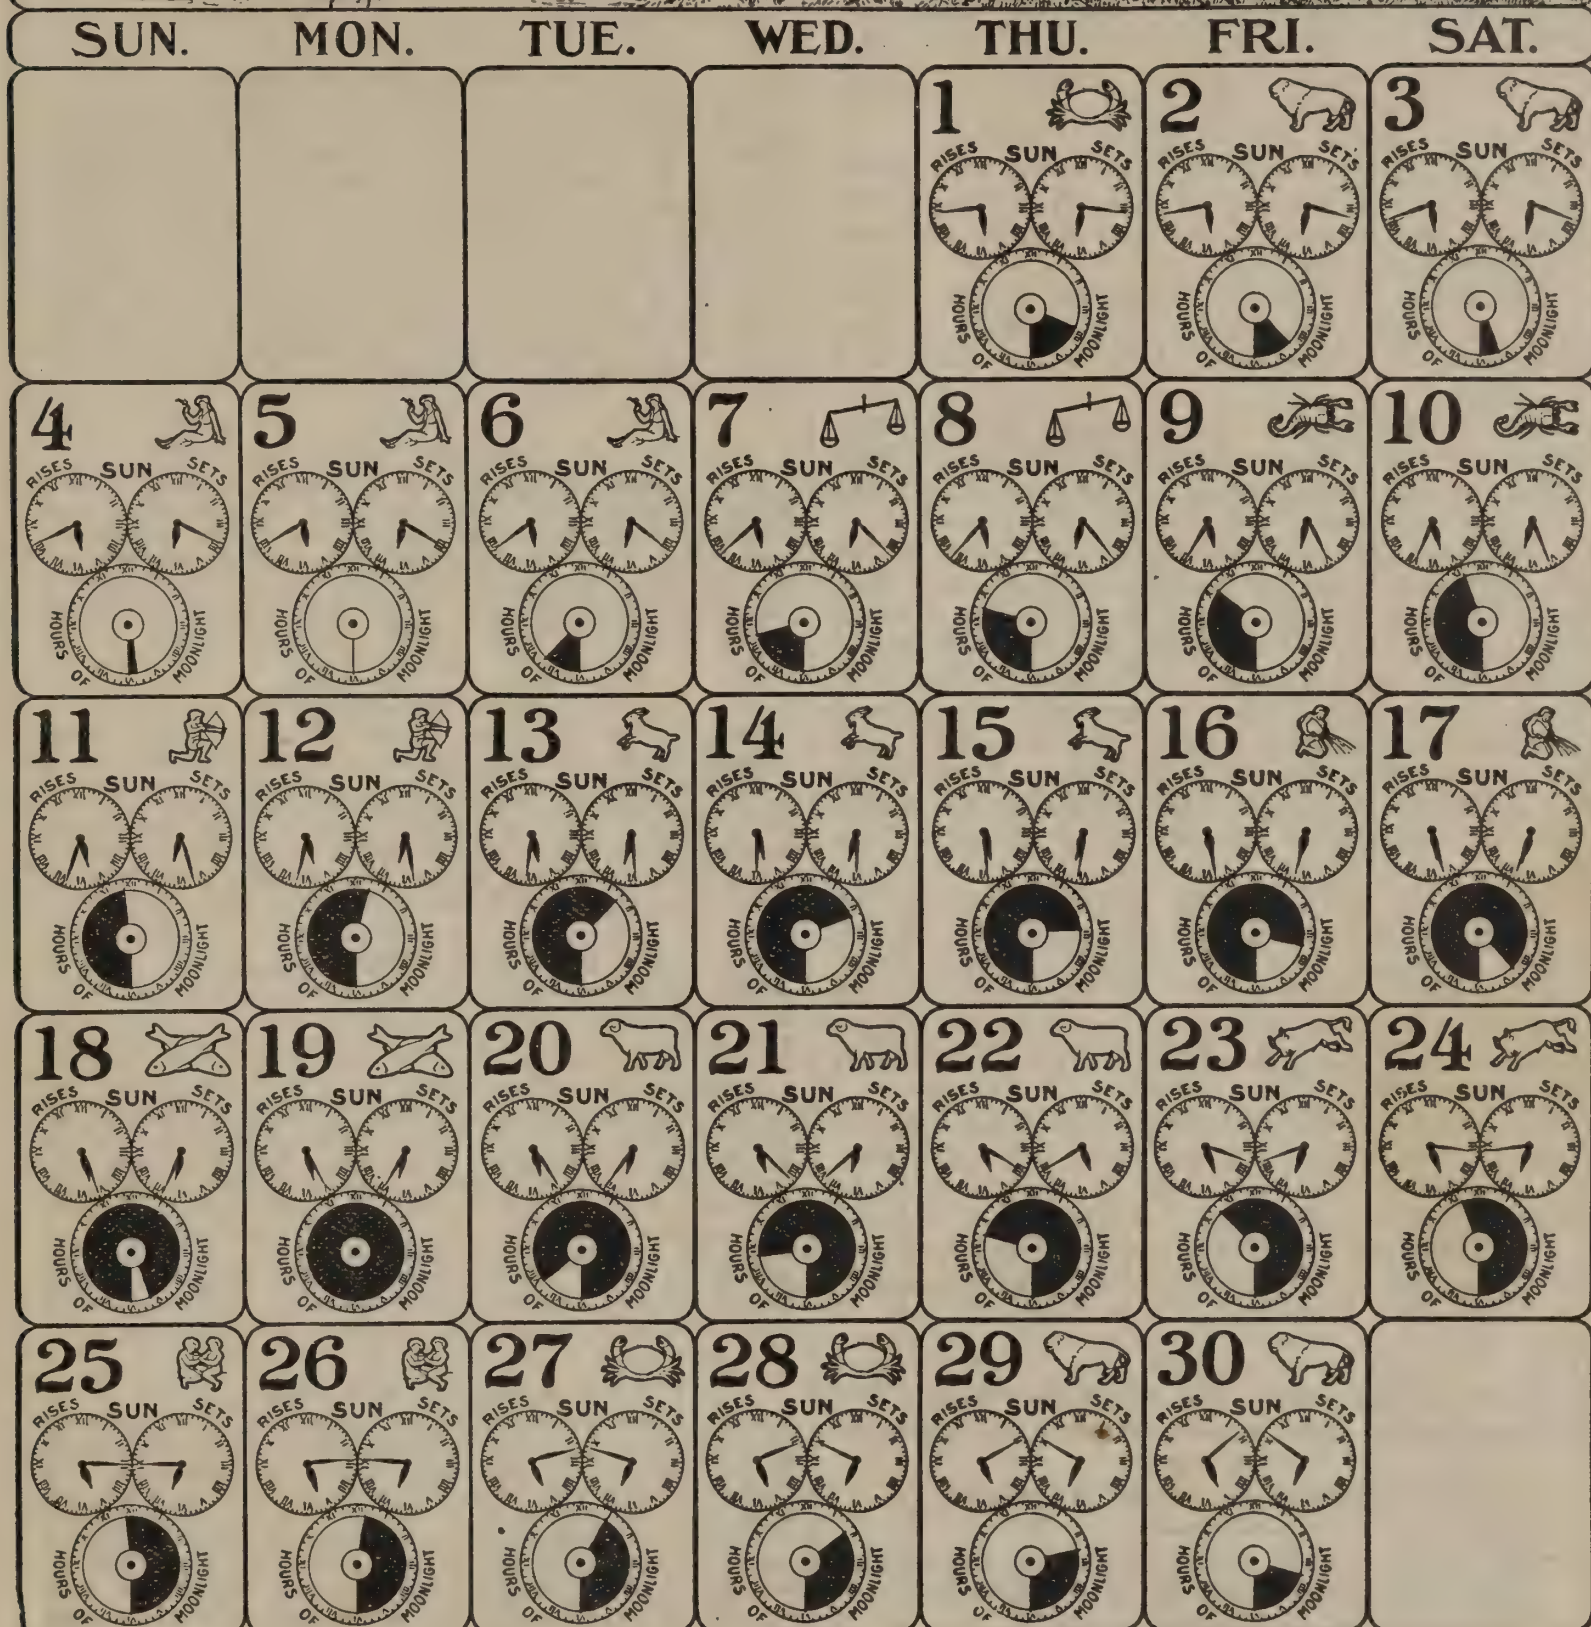

1. A sudden fall of temperature indicates that a storm is forming at the south, probably at a great distance.
2. A sudden rise of temperature indicates a storm forming at the north.
3. Winds usually blow from a region of fair weather toward a region where a storm is forming.
4. Cirrus clouds (thin, fleecy or curly clouds very high in the sky) move from a region of storm toward a region of fair weather.
5. Cumulus clouds (large masses of cloud of a hemispherical form above and flat below, one often piled above another) move from a region where a storm is forming.
6. Cirrus clouds moving rapidly from the north or northeast usually mean rain within twenty-four hours.
7. Cirrus clouds moving rapidly from the south or southeast are an indication of rain or snow and cooler weather.
8. The wind moves in a circle around a storm. When during a rain storm the wind blows from the south, the heaviest rain is west of you; if from the north, the heaviest rain is east of you; if from the east, the heaviest rain is south of you.
9. There is very little or no wind unless rain or snow is falling within one thousand

Fleming's Spavin and Ringbone Paste

There is no other remedy that resembles this one, either in appearance or in the work it does. No matter what else you have used, you have never used anything that looks like or acts like Fleming's Spavin and Ringbone Paste.

The bottle is ridiculously small, but it contains more than you would ever use on a single case, and we have known of thirteen Ringbones being cured with one package.

Fleming's Spavin and Ringbone Paste is for three kinds of cases only. It cures Bone Spavin, Ringbone and Sidebone. Use it on these and no others.

By saying that it cures, we mean that it cures the lameness. We do not claim that this or any other remedy can take off a hard, bony bunch. If there is no lameness, let the case alone.

Fleming's Spavin and Ringbone Paste is for the well developed cases, even the old ones that have disabled the horse and have been fired without success. It cures them nearly every time, and usually with a single application. There will likely be a small scar where the Paste was applied, but a scar is better than lameness. Do not try to treat the horse and work him at the same time. He must have rest in the stable, and the usual time required is a month to six weeks.

When you catch a Bone Spavin, Ringbone or Sidebone just coming on, and especially if the horse is young and you wish to avoid a scar, use Fleming's Spavin Cure (Liquid)—but do not use the Liquid upon an old or well developed case of the kind and expect us to guarantee it to cure.

Fleming's Spavin and Ringbone Paste is guaranteed. We refund the money if it doesn't cure the lameness. Nothing need be said here as to its merit—that is told by the letters that follow.

For information concerning the different kinds of blemishes and different forms of lameness, see Fleming's Vest-Pocket Veterinary Adviser.

Fleming's Spavin and Ringbone Paste.

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

THE PARSONAGE, SNYDERTOWN CHARGE,
Central Pennsylvania M. E. Conference.

W. A. Carver, Pastor.

Messrs. Fleming Bros., Chicago, Ill.

Dear Sirs:—When men are in business and have a good thing to offer the public, it is no more than fair that those who are benefited by it should acknowledge the fact. I have a pacing horse that before it developed a Bone Spavin was on the race track and sold for \$1,000. I bought it and drove it for two years, when it got so lame that I feared it would no longer serve my purpose. It had been fired and blistered by expert veterinarians, and the tissues over the lump were calloused. I procured from you your Spavin and Ringbone Paste, applied it once and let the animal stand for eight weeks. For some time after putting him on the road again I was doubtful as to any permanent results, as the limping did not cease all at once. I continued to drive him and he continued to improve until for the past year he has shown no signs of lameness

at all, steps straight and stands square on all four legs. I think there may be a trifle of weakness remaining, but otherwise he is sound again.

I wish also to state that this letter was not solicited, but is a voluntary expression of my faith in your remedy and my appreciation of what it has done for my horse. Sincerely yours,

W. A. CARVER,
Snydertown, Pa.

One Bottle Cured Eight

Gentlemen:—Three years ago I bought a driving mare which proved to have a very bad Ringbone. I tried all the remedies I heard of, but she grew worse. I saw an advertisement of your Spavin and Ringbone Paste and sent for a bottle. When it came and I saw the small amount, I thought, "A fool and his money are soon parted," but in four months the mare was on the R. F. D. route, making a twenty-four mile trip every other day, and no signs of lameness. Surely it was worth \$100 to me. I have used it on seven other cases with equally good results.—H. B. Ward, Bliss, N. Y.

Fired Twice

Dear Sirs:—I bought a fine horse that had a large Ringbone on his right hind foot, and he was so lame that he could hardly go. This Ringbone had been fired by two different veterinarians, but it did him no good. I sent for a package of Spavin and Ringbone Paste and one application cured him.—C. D. Reynolds, Bergen, N. Y.

Beat the Neighbor

Dear Sirs:—I have cured a very bad Bone Spavin on a valuable horse with your Spavin and Ringbone Paste after having used four bottles of another remedy with no benefit. A neighbor of mine had a spavined horse treated with hot irons on the same day that I applied your Paste. After six weeks' rest my horse was cured, while his is lame yet.—Chris Foester, Roanoke, Ill.

Walked On Three Legs

Gentlemen:—I have a mare twenty-four years old that had a Ringbone of four years' standing. The lameness, though slight at first, increased until the horse walked on three legs. A veterinary surgeon blistered it, then fired it, but it got no better. In the spring of 1907 I ordered a bottle of your Spavin and Ringbone Paste and immediately used one application. This was not sufficient, so later on I applied it again on a different spot with the result that she is now entirely cured, able to do regular work on hard roads or soft ground without showing any lameness. I would not be afraid of failure on any Spavin or Ringbone now, for I believe this was as hard a case as you will ever find.—S. R. Martz, Grundy Center, Iowa.

A Pig for a Horse

Dear Sirs:—About eight months ago I sent to you and got a bottle of your Spavin and Ringbone Paste. I had a horse with a bad Ringbone. I traded a pig for him. The man who had owned him had been trying to cure him for two years. A neighbor who moved here from Illinois had tried your Spavin and Ringbone Paste on one of his horses, and advised me to use it on mine. He was so bad that he went on three feet when starting out, but I got a bottle and it did the work. I sold him this fall for \$50. Please send me your Vest-Pocket Veterinary Adviser.—L. M. Haselton, Butler, S. Dak.

Could Hardly Walk

Gentlemen:—I have been reading a book of yours in which you publish quite a number of testimonials, but find none from this section of the country, so will tell you my experience. I have a horse that had Bone Spavin for eighteen months and was so lame that he could hardly walk when I took him out of the stable. I had a horse doctor treat him a while, but it did no good. Then I saw your advertisement in the Farm Journal and ordered a package of Spavin and Ringbone Paste. Two applications entirely cured him. Then I gave what I had left to the horse doctor and he

cured a horse with it. I am thankful for the work it did, and am pleased to recommend it to others.—Irwin S. Hallman, Meadowbrook Farm, Skippack, Pa.

Laid Down Three Weeks

Gentlemen:—About four years ago I sent for a bottle of your Spavin and Ringbone Paste, which did fine work on a very bad case of Ringbone. The mare had Ringbone on both fore feet and for three or four weeks she laid on her side and could not get up. The Paste has cured her, and I can say it is a grand remedy for Ringbone.—Wellington B. Propst, R. F. D. No. 2, Clarksburg, W. Va.

Told To Kill Her

Dear Sirs:—I cannot recommend your Spavin and Ringbone Paste too highly. It has cured a case of Ringbone for me after my home veterinarian told me to take the mare out and kill her. Since I got her cured, he asked how I did it, and I told him that if he was going to practice medicine he had better learn how to cure Ringbone. Not only was it a bad case of Ringbone, but the shoulder on that side was shrunk away until I might almost say she had only one shoulder. This, of course, was caused from the Ringbone, and the shoulder has now filled out again. The Paste is a wonderful cure and I am very thankful to you.—G. W. Engle, Clarksburg, Ill.

Carried Leg Six Months

Gentlemen:—More than a year ago I purchased a bottle of Spavin and Ringbone Paste and think it was the best investment I ever made. I had a horse with Bone Spavin so bad that he had carried that leg for over six months. Nothing would relieve it until I tried your remedy. Two applications did the work, and today he travels on four feet as good as ever.—J. Elbert Edwards, R. F. D. No. 11, Harpers Ferry, West Va.

Eight-Year-Old Spavin

Dear Sirs:—Will you kindly send me Fleming's Vest Pocket Veterinary Adviser? One of my horses had Bone Spavin for eight years and got so lame he could hardly walk when first starting. Two applications of Fleming's Spavin and Ringbone Paste cured him of all lameness. I think it is the best remedy in the world.—T. G. Reynolds, Elwood, Neb.

Eight-Year-Old Ringbone

Dear Sirs:—I will write to let you know what your Spavin and Ringbone Paste has done for me. One application of it cured a Ringbone of eight years' standing, and I am glad to recommend the remedy to others.—G. W. Willigs, New Market, Tenn.

Two Doctors Gave It Up

Gentlemen:—I wish to state that your Spavin and Ringbone Paste is all right and will do all you claim. I tried it last spring and now my horse is as sound as ever. He had been given up by two veterinarians.—C. O. Hausknecht, Overton, Pa.

Made the Crop

Dear Sirs:—A friend of mine bought a mare with a bad Bone Spavin. He was to pay \$25 for her if she could make a crop; but if not able to do that, he was to get her for nothing. Knowing I was a horse doctor, he brought her to me. I sent for a bottle of your Spavin and Ringbone Paste, treated her with it, and for two years she has been sound and well. I like your remedies and your guarantee, as I believe both are all right.—John M. Hammock, R. F. D. No. 5, Wrightsville, Ga.

Better Than a Dead Horse

Dear Sirs:—Two years ago I sent for your Spavin and Ringbone Paste and used it on a seventeen-year-old horse that had a Ringbone so bad that I was seriously advised to kill her. I applied the remedy, and today the horse is as sound as ever and has not limped a step in twenty

months. I recommended the remedy to two of my neighbors and it cured their horses. This morning a man drove three miles to ask about the remedy, and I most cheerfully recommended it and gave him your address.—M. E. Rice, R. F. D. No. 5, Easton, Pa.

Thinks It Is A Wonder

Gentlemen:—I feel under obligation to write and tell you what Fleming's Spavin and Ringbone Paste did for me, or rather for my horse. It cured an old and long-standing Bone Spavin sound and well with one application. He now does all kinds of work, driving or pulling heavy loads, and it is all the same. I think this remedy is a wonder.—C. M. Mertz, Burnetts Creek, Ind.

Cured Sidebone

Gentlemen:—Three or four years ago I ordered a bottle of Fleming's Spavin and Ringbone Paste to treat a Sidebone, and it cured it after everything else failed. The Paste is straight goods.—C. M. Hanchey, R. F. D. No. 1, Hope, Ark.

No Lameness In Three Years

Dear Sirs:—Three years ago a mare of mine had a Bone Spavin, and I got a bottle of your Spavin and Ringbone Paste. One application did the work and I have been using her ever since and she has never shown any lameness. Last fall I bought a mare with a colt by her side. She was spavined so bad that she could not put her foot to the ground. I used two applications of the Paste, and now she is running and jumping the same as any other high spirited horse. I have confidence in your remedies and believe they will do all you claim.—J. W. Boyd, Paeonian Springs, Va.

Short But Good

Gentlemen:—Last winter I sent to you for your Spavin and Ringbone Paste. It worked just as you said it would. Before using the Paste I would have taken \$10 for the horse, but today I should refuse \$100. Many thanks.—W. A. Johnson, R. F. D. No. 2, Atlantic, Iowa.

(Continued from page 10)

miles. 10. A rosy sky at sunset indicates fine weather; a decided red tint, rain; a red sky in the morning, unsettled weather; a gray sky, fine weather; much wind is apt to bring rain; hard-edged, oily-looking clouds suggest wind; a clear, light-blue sky, fine weather; a gloomy, dark-blue sky, windy weather; a pale yellow sky at sunset, wet weather; a bright yellow sky at sunset, wind; a greenish sky at sunset, wind and rain; very clear atmosphere near the earth, causing distant objects to appear nearer than usual, indicates rain.

Fineness of Soil

In one gram of soil from your farm, as much as would fill a cylinder a quarter of an inch in diameter and half an inch long, how many separate particles are there? Many would say that the question is too foolish to think about, nevertheless it pertains to a matter of great importance, and if you were to make a guess you would likely name too low a number. It is the finer particles, composed of decayed animal and vegetable matter, mineral salts, etc., that constitute the fertility of the soil. Scientists studying soils have determined that where there are less than a billion and a half particles to the gram, the land is altogether too poor for farming purposes. Where there are two billion particles to the gram and the chemical constituents of the soil are favorable, one may do very well with certain small truck, such as beans, peas, lettuce, radishes, etc. For potatoes, cabbage, corn, tomatoes, etc., there ought to be at least three and a half billion particles. Twelve billion particles to the gram makes a fair wheat and grass land, but for first-class crops of this kind there should be about fourteen billion. Taking a pinch of soil in one's fingers, the part that is felt as grit is the sand, to each grain of which there are thousands of particles that we do not feel, and

Fleming's Spavin Cure (Liquid)

This remedy is in liquid form, but it is not a liniment. If used like a liniment, you would be using too much. The directions will make that plain.

Fleming's Spavin Cure (Liquid) is used upon all blemishes except such as we advise treating with the Spavin and Ringbone Paste. In order that you may more clearly understand what to use it for and what to expect it to do, we will give brief mention to the principal kinds of cases for which it affords a suitable treatment.

Bog Spavin:—If the horse is lame or shows signs of weakness in the part, treat the case, using Fleming's Spavin Cure (Liquid). It will cure the lameness and nearly always take away the enlargement. If there is no lameness the bunch is apt to be obstinate, and its removal more doubtful than in cases where lameness is present. We think that treatment is completely successful in only about 75 per cent. of such cases, so unless the bunch seems to be increasing we do not urge attempting to remove it, and especially if the horse is of the large-boned type.

Bog Spavins and similar puffy enlargements sometimes appear upon the hocks of young colts. Usually in these cases there is no lameness and we advise letting them alone, as they will in most instances disappear of their own accord where the animal is under two years old.

Some confuse Bog Spavin and Blood Spavin. Blood Spavin is merely a dilation of the vein crossing the part. It is both harmless and incurable.

Thoroughpin:—This is practically the same in character as Bog Spavin, but differently situated. What is said in reference to treating Bog Spavin applies to Thoroughpin also.

Capped Hock:—A few treatments with Fleming's Spavin Cure (Liquid) will remove this blemish completely, unless the case is unreasonably old. If it has been there a year or more and is causing no trouble, let it alone.

Splint:—Treat all recent cases with Fleming's Spavin Cure (Liquid), whether causing lameness or not. This will remove them entirely. Of the old cases, six months or over, treat only those causing lameness, for with time the bunch hardens down and cannot be removed.

Curb:—What is said about Splint applies in a general way to Curb. Treat all the new cases, and all the old ones that are giving trouble.

Wind Galls:—These blemishes are nearly always harmless. They can often be removed, but treating for this result is uncertain, so we do not urge it. If they cause lameness, treat them, using Fleming's Spavin Cure (Liquid).

Callous Bunches:—Fleming's Spavin Cure (Liquid) is the surest remedy you can use to reduce blemishes resulting from wire cuts, kicks and other injuries. It is usually effective in such cases.

Stifle Lameness:—Allow rest and use Fleming's Spavin Cure (Liquid) on a small spot over the affected part, repeating on different spots at intervals of ten days or two weeks. The remedy has been very successful in cases of this kind.

Recent Bone Spavin:—If you catch a Bone or "Jack" Spavin in the very beginning, and especially if the animal is young, you can cure the lameness permanently and nearly always take the bunch away smooth and clean with Fleming's Spavin Cure (Liquid), and this without leaving a

mark or scar. But notice that we say RECENT cases—we do not claim that it will produce such results where the blemish has become well established. It does frequently cure the lameness in the older cases, and if you happen to have the remedy on hand it is well to give it a trial. But if you are ordering a remedy to treat Bone Spavin that has been observed for six months or so and is causing marked lameness, get Fleming's Spavin and Ringbone Paste. Let Bone Spavin alone altogether if there are no signs of lameness.

Recent Ringbone:—Where Ringbone is just beginning to lame a young horse, use Fleming's Spavin Cure (Liquid), especially if you wish to avoid a scar. The bunch cannot be reduced except in a few of the most recent cases. Where the case is somewhat advanced the Spavin and Ringbone Paste will be required, but do not treat with this remedy unless there is marked lameness.

Recent Sidebone:—What we have said about Ringbone will apply to Sidebone also, which is much the same and requires the same treatment.

Fleming's Spavin Cure (Liquid) does not scar the horse. It blisters, but the hair grows in again when the part is healed.

We guarantee it to the extent of the claims we make for it, and refund the money if it fails. It has a number of uses not mentioned above, but explained in Fleming's Vest-Pocket Veterinary Adviser. We refer you to this book for illustrations and descriptions of different kinds of blemishes and forms of lameness.

Fleming's Spavin Cure (Liquid).

Per bottle, \$2. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

Removed The Curb

Gentlemen:—Several weeks ago I ordered a bottle of your Spavin Cure (Liquid) and applied same to a Curb on which I had tried a great many so-called cures, all of which had failed to make any impression. Now I wish to tell you that one application of your remedy removed the blemish. I will recommend your remedies to all my friends, as I feel I can do them no greater favor. The little Veterinary Adviser that you sent me I gave to a friend who has charge of all the horses for a large department store, so will ask you to kindly send me another, as I consider it a very valuable book.—C. B. Lawrence, Norwalk, Ohio.

Worth Ten Times Its Cost

Dear Sirs:—I am well pleased with your Spavin Cure (Liquid). I have a two-year-old colt which had Bog Spavin, and this remedy has cured it by applying only once. The colt is perfectly sound and well, and the remedy was worth ten times the price I paid you for it.—Christ Luther, R. F. D. No. 9, Boonville, Ind.

Worth Nothing; Sold For \$175

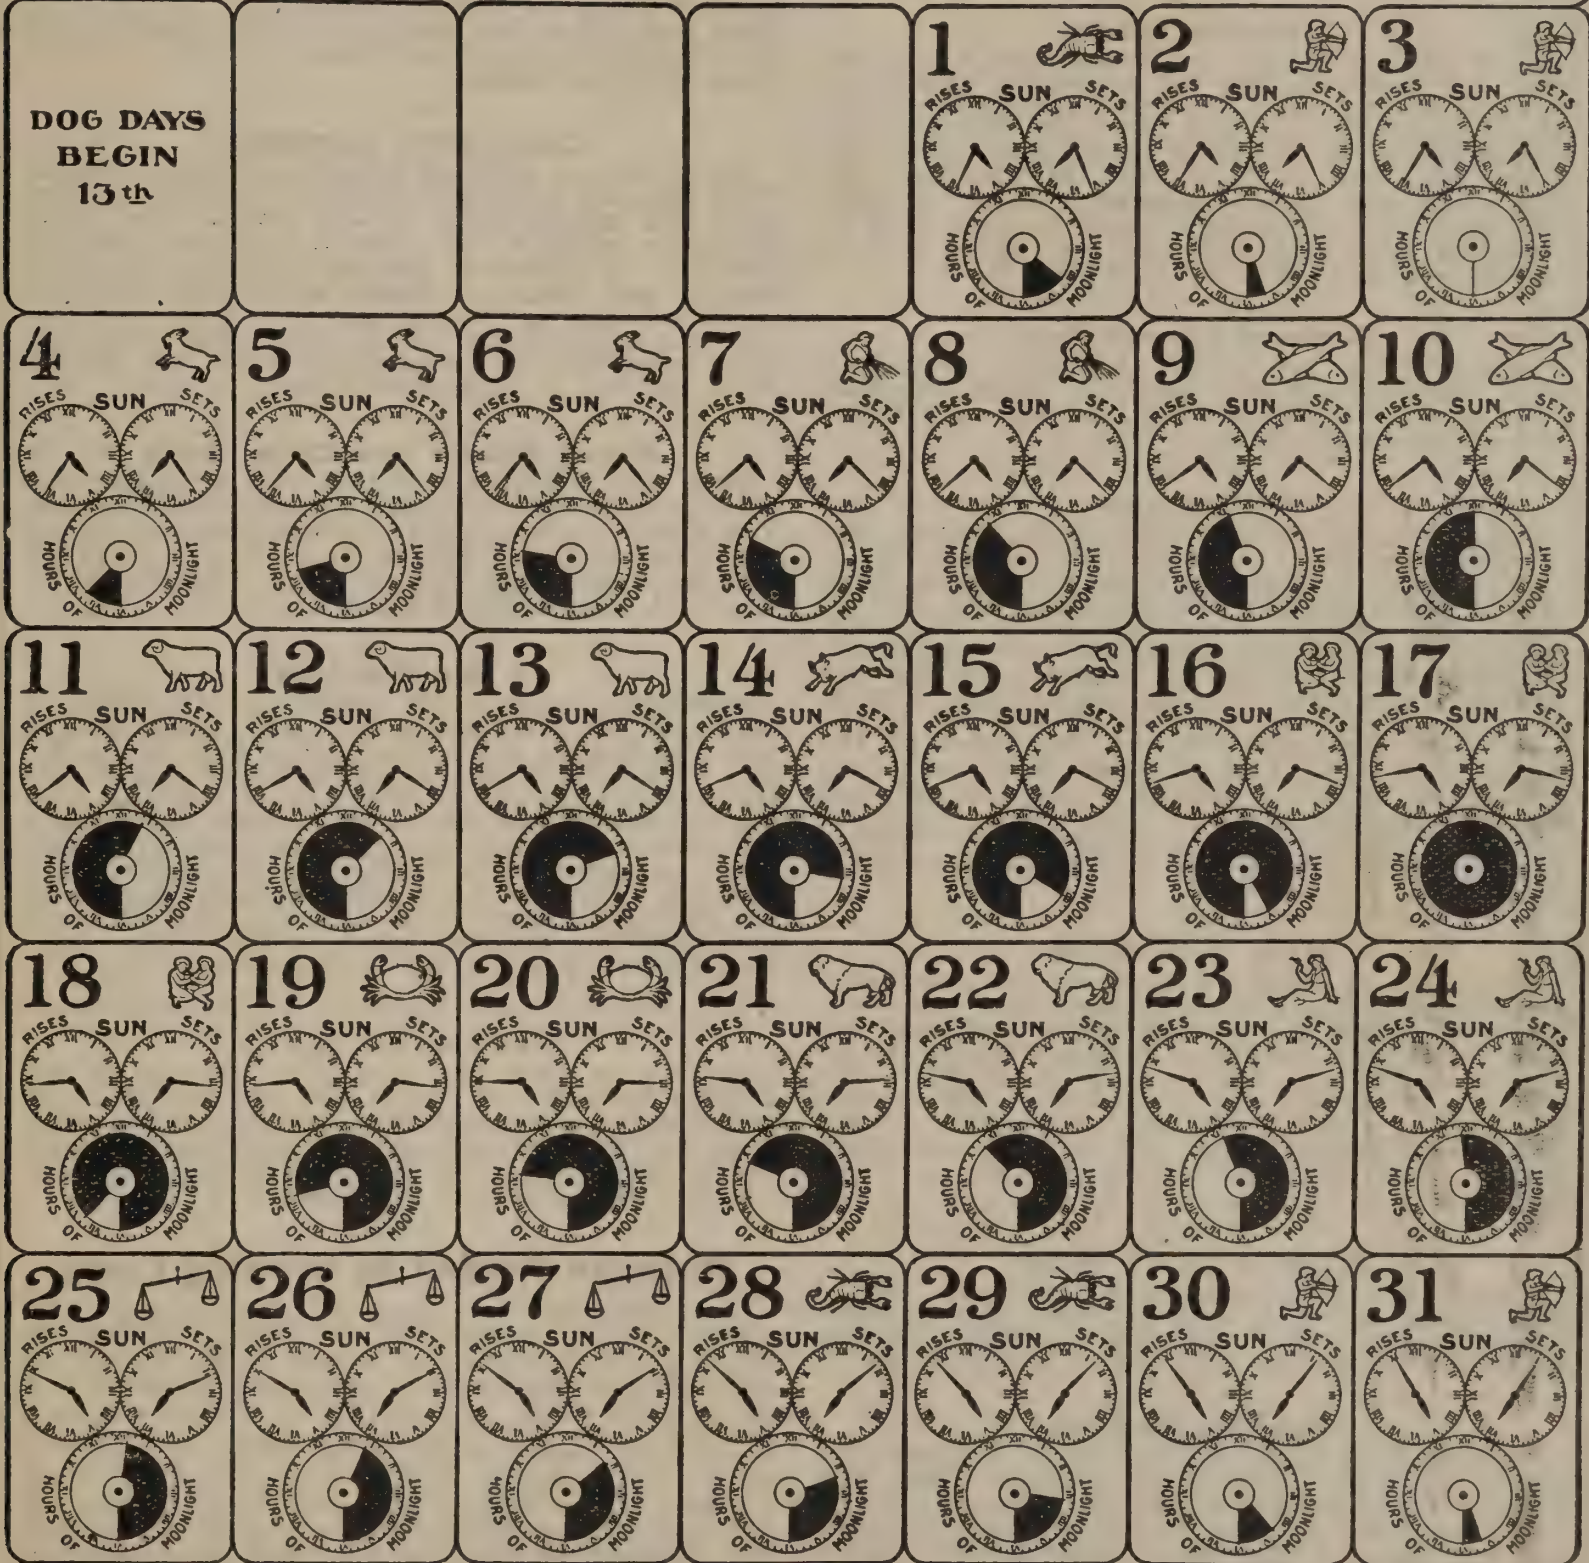

Dear Sirs:—A colt of mine got its leg hurt when about three months old. A bunch grew where the injury occurred and I bought a remedy that was guaranteed to remove it. It did more harm than good, and I never could get my money back. The bunch grew until it was as large as my head, and I about decided to quit trying to do anything for it. I was told about your Spavin Cure (Liquid) and concluded to make one more effort. As soon as I began to use this remedy, the bunch began to grow smaller, and finally every bit of it was gone. When the colt was two and a half years old, I sold her for \$175, and she would not have been worth anything whatever if it had not been for your remedy. I also cured a Spavin on a mule with the same bottle.—A. J. Harper, Ellijay, Ga.

Saved Hundreds of Dollars

Gentlemen:—I am very thankful to say that your Spavin Cure (Liquid) has cured a very bad case

SUN. MON. TUE. WED. THU. FRI. SAT.

of Bog Spavin and Thoroughpin on a well-bred stallion. I thought at the time I began to use it that he was spoiled for life, but now no one could tell that he ever had a blemish. The part is just as sound and clean as ever, and I consider that the remedy has saved me hundreds of dollars on this one case. As long as I have horses about me, your Spavin Cure (Liquid), Tonic Heave Remedy and Colic Cure will always be in my stable.—James Loghan, Deckerville, Mich.

Bad Bog Spavin

Dear Sirs:—You may remember that about one year ago I sent to you for a bottle of Fleming's Spavin Cure (Liquid). My horse had a Bog Spavin which was very bad, and neighbors told me that they never knew one to be cured, and that I had better take him to the woods and kill him. He was cured with three applications of the remedy, and these same neighbors would be very glad to have him, especially when they are liable to meet an auto.—Eugene Barber, Rockdale, N. Y.

Removed Capped Hock

Dear Sirs:—I had a very bad case of Capped Hock, but cured it very nicely by using only half a bottle of your Spavin Cure (Liquid).—Nathaniel Dring, Adamsville, R. I.

An Odd Case

Gentlemen:—About one year ago I ordered and received from you one bottle of Fleming's Spavin Cure (Liquid) and applied same to a young horse with a much swollen pastern, lame and thin in flesh. Am more than gratified to say that after two months the horse was permanently cured, the swelling together with the lameness having absolutely disappeared, leaving the foot and limb in as good a condition as any of his others. At the very least, this added \$50 to the value of the horse. This horse, I am informed, had been bitten by a snake, which caused him to lose his hoof, and although nature supplied a new hoof, the ankle remained swollen and caused him to be lame.—T. M. Michael, Justice of the Peace, Greenland, West Va.

Made Good Profit

Dear Sirs:—I bought a five-year-old mare at a sale for \$107.50. Several wanted her, but were afraid of a Bog Spavin that looked very bad and kept them from bidding. I took her home, and as I had part of a bottle of your Spavin Cure (Liquid), I began using it, and in a few months sold her to a dealer for \$210, spot cash. I have had equally good success with it on several other cases.—Chas. H. Siner, R. F. D. No. 4, Terre Haute, Ind.

Cured a \$1,500 Horse

Gentlemen:—The Spavin Cure (Liquid) that I got from you took a pair of Curbs off a valuable horse for me, and I sold him for \$300. He has since sold for \$1,500.—Jack Allen, Berlin, Tenn.

Sprained Tendons

Gentlemen:—Your Spavin Cure (Liquid) has cured two cases of Sprained Tendons. The first horse I treated had been lame for about two years, and I had used a blister from a veterinarian without any help. Your remedy fixed it fine.—Christian Tang, Hawley, Minn.

A Bad Thoroughpin

Dear Sirs:—Please send me a copy of your Vest-Pocket Veterinary Adviser. I have used your Spavin Cure (Liquid) and think it the greatest medicine I ever tried. It cured a case of Thoroughpin that was so bad that the horse could hardly walk. One of my neighbors cured two cases of Spavin with it, and you could hardly miss what we have used out of the bottle.—John Silvey, Silver City, Iowa.

Horse Worthless

Dear Sirs:—Some seven years ago I wrote you for a bottle of Spavin Cure (Liquid). My horse

had Bog Spavin so bad that he was worthless to me, and your remedy cured him sound and well. It does just what you say. Please send me your Veterinary Adviser.—J. W. Whitten, Louisville, Miss.

Cured One Bog and Two Splints

Gentlemen:—Enclosed find check for \$5 for which send me four bottles of Colic Cure and one bottle of Spavin Cure (Liquid). What I got from you last fall gave perfect satisfaction. The Spavin Cure took off a Bog Spavin and two Splints, and the Colic Cure is a grand thing also.—C. W. Danforth, Carroll, Maine.

Cured Stifle Lameness

Dear Sirs:—I ordered a bottle of your Spavin Cure (Liquid) for a stifled horse and it cured him with two applications. I also had a mare with Ringbone, which I had tried to cure with another remedy. A neighbor having a bottle of your Spavin and Ringbone Paste with which he had cured a horse for himself, gave me what was left and two applications of it cured the Ringbone. Your remedies are certainly fine.—J. W. Moyer, R. F. D. No. 2, Estherville, Iowa.

Occult Spavin and Collar Boils

Dear Sirs:—Enclosed find \$5 for an assortment of your veterinary remedies as per order enclosed. The Spavin Cure (Liquid) ordered from you cured my horse of Occult Spavin, and I have also taken off two Collar Boils with it.—J. C. Lindsay, R. F. D. No. 1, Macksville, Kansas.

A Bad Old Case

Gentlemen:—About six years ago I bought a horse for \$35 that had a bad leg. Some said it was Bog Spavin and others said it was Thoroughpin. Whatever it was, it was bad, and a man who thought he knew horses said I could not cure him. He had rested that foot so much that the hip was far below the other one. I saw your advertisement and procured a bottle of your Spavin Cure (Liquid), which was a decided success. He shows no lameness, the hip is up with the other one, and you could not buy him today for \$100.—Mrs. Hattie Cushing, R. F. D. No. 1, Meredith, N. H.

(Continued from page 14)

compared to their size, each grain of sand is like a huge boulder. Of course, the fineness of a soil is not the only consideration, as something depends upon its chemical balance. The four chemical elements most liable to be deficient are nitrogen, phosphorus, potassium and calcium.

Moisture Needed by Growing Crops

Attempts have been made to ascertain the quantity of water essential to the normal growth of crops. The investigation seems to show that an acre of clover should have about four hundred tons of water to bring it to maturity. Wheat and oats can get along with twenty-five tons less, while an even three hundred tons will do for an acre of corn. These figures have reference to the water actually taken up by the plants and thrown off into the air through the leaves, and do not include that evaporated from the soil. For the production of each pound of dry matter, it would appear that the plant handles about three hundred pounds of moisture.

Crops That Paid Big

The 1907 crop of pears from a sixteen-acre orchard in Rogue River Valley, Oregon, brought \$19,000, an average of \$1,187.50 per acre.

A ten-acre pear orchard near the one mentioned above was purchased for \$5,600, and the succeeding crop not only paid for the orchard, but left the new owner a comfortable surplus of \$4,000.

Fifty acres of seven-year-old trees near Dayton, Wash., yielded a picking of apples in 1907 that

These Ought to be in Every Stable All the Time

Fleming's Colic Cure

An order for Fleming's Colic Cure makes us think, "There is a prudent man."

We know that it is not ordered to treat a horse that has colic at the time, but that it is ordered as a precaution and a means of protection against colic loss, much as one insures his buildings against possible loss by fire.

We know, too, that his having the remedy on hand affords a measure of security to his whole neighborhood, for it puts him in position to be of valuable service to any neighbor who may have a horse attacked.

Read the testimonials about the Colic Cure. They will make plain to you the good work that the remedy does, and will show how often it enables a man to do a neighbor a good turn.

A million bottles of Fleming's Colic Cure ought to be sold every year. It is good enough to deserve so large a sale, and the annual colic loss is great enough to justify every horse owner in buying a bottle.

Colic comes unexpectedly and does its work quickly. Safety lies in being prepared for it.

Include this remedy when you order; or, if you need nothing else, order the Colic Cure alone. The satisfaction of having it on hand is worth more than the dollar it costs.

Fleming's Veterinary Healing Oil

Accidents will occur.

Even if you have no barbed wire on your farm, there is sure to come a time when you ought to have Fleming's Veterinary Healing Oil.

No matter how slight a wound may be, lack of proper treatment may make a bad case of it.

We do not believe there is any other general healing remedy so good.

Order a bottle so that you will have it when you need it.

Fleming's Tonic Heave Remedy

A horse does not need to have heaves in order to need Fleming's Tonic Heave Remedy.

It is used for other disorders fully as much as it is for heaves.

There is nothing in it especially for heaves, or that has specific action upon the respiratory organs.

It is simply a tonic and blood purifier for horses.

A tonic is a medicine that tends to correct functional laxity—that tones up the vital processes by which life and health are maintained.

Fleming's Tonic Heave Remedy, being both a tonic and blood purifier, not only tends to restore normal digestive processes, but at the same time impurities are eliminated from the blood so that it may receive, carry and distribute the nourishing elements derived from the food.

With this accomplished, each organ is made strong and active for the work it has to do, and the result is that state of functional harmony that we call health.

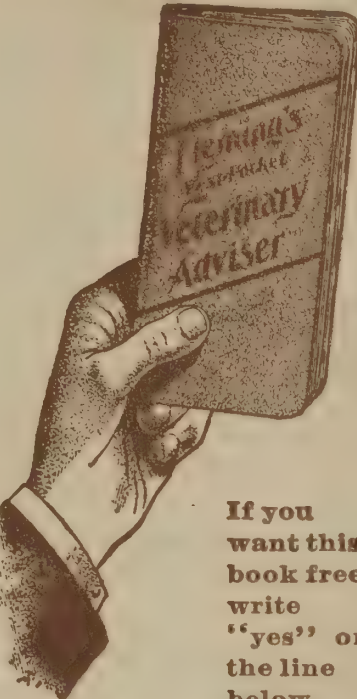

It is by this process that Fleming's Tonic Heave Remedy cures heaves, and you may readily understand that it should be just as good for any other ailment requiring a tonic and blood-purifying treatment.

Use it for horses that are lean, run down or lacking in strength or spirit, also for horses with failing appetite, or for those that have the appetite but remain thin and weak in spite of care and feeding.

For hide-bound, rough coat, scurfy skin, skin eruptions, etc., we know of nothing that equals it.

Many horses need a tonic and blood remedy in the spring at shedding time. Fleming's Tonic Heave Remedy is excellent to tone up such a horse and put him in shape for spring work.

It is economical to use because it helps quickly and a package goes so far, and we will send your money back if you are not satisfied.

If you want this book free write "yes" on the line below.

Contains 192 pages and 69 illustrations, durably bound in leatherette.

Fleming's Tonic

Heave Remedy

In one sense, the name of this remedy is misleading. Judging from the name, one would suppose it to be a mixture of drugs having specific action upon the respiratory organs, and intended exclusively for the treatment of Heaves.

The fact is, it contains nothing that acts directly upon the respiratory system, but is instead a general tonic and blood purifying remedy that is used just as much for other disorders as it is for Heaves.

This being so, it may seem odd that it should cure Heaves, but that point is made clear when we understand that Heaves is not a disease of the lungs, but rather a reflex nervous disorder, usually arising from digestive derangement. This explains why overfeeding, drinking too copiously of cold water, etc., so often tends to aggravate the heaving. Of course, many cases of Heaves are attended by catarrhal affections of the head, throat or bronchial passages, but these exist more as complications than as a part of the real ailment.

Broadly speaking, a tonic is a remedy that tends to correct trouble wherever it exists. This is done by gradually and permanently improving digestion and assimilation, and imparting strength and tone to the whole system. In this way the cause of the heaving is gradually removed. If there are catarrhal complications, the case is apt to prove more troublesome, but through the same general tonic effect, and through the blood purifying action of the remedy, these are usually overcome as well.

It would be wrong to say that all cases of Heaves are curable. We offer this remedy, not as a certain cure, but as the best we are able to supply, and, as we believe, the best remedy for Heaves that has ever been prepared.

Cases vary. Some are more easily cured than others, regardless of how bad they seem to be or how long they have existed. The usual quantity required is one to three packages. Even if no improvement is seen from the first package, it is advisable to use a second, as our experience shows that many cases are slow to yield at first, but come out all right in the end. Where a mare having Heaves is in foal, the remedy is not apt to benefit as it otherwise would, and we advise deferring treatment until after foaling time.

Do not use Fleming's Tonic Heave Remedy with a view to quickly and temporarily suppressing the symptoms in order to make a trade. It acts slowly and is calculated to cure rather than produce apparent cures.

The percentage of cases that will not yield to this treatment is small, and even where a complete cure cannot be effected, the horse is usually so far relieved that he is able to work in comfort, so that the remedy has been worth far more than its cost. If, however, any one is not satisfied with results, we will refund the price he paid.

Other Uses

Being an excellent general tonic and blood purifier for horses, Fleming's Tonic Heave Remedy is used successfully for a variety of disorders, such as thin flesh, hide-bound, rough coat, general weakness, indigestion, catarrhal troubles, chronic coughs, blood derangement, skin diseases, etc. For putting run-down horses in condition, or to tone up the system at shedding time in the spring, we do not think anything can equal it. It is easily given, any horse will take it readily, and it is economical to use for these purposes because a package goes so far.

Fleming's Tonic Heave Remedy.

Per package, \$1. See assortment offer on inside of back cover.

Mailed prepaid on receipt of amount.

BLACK & BIRKHEAD,
Proprietors

Hartford Livery, Beaver Dam Transfer and
Freight Line, Hartford, Ky.

Fleming Bros., Chicago, Ill.

Gentlemen:—Enclosed find postal order for \$2, for which please send us two packages of Fleming's Tonic Heave Remedy. As far as we have used it, it has knocked the Heaves every shot.

Yours truly, BLACK & BIRKHEAD.

ROCKY MOUNTAIN BELL TELEPHONE CO.,
Manager's Office.
Garfield, Utah.

Fleming Bros., Union Stock Yards, Chicago.

Gentlemen:—Attached please find money order for \$3 for three boxes of your Tonic Heave Remedy. You will remember I sent you an order for this remedy some time ago. I used it on a horse that was all run down, and I had about given her up as worthless. This remedy placed her on her feet again and now she is one of my best horses. As a tonic it is something wonderful. I am recommending it to my friends as the best.

Respectfully, J. W. CLARK.

Could Hardly Get To Water

Dear Sirs:—Enclosed find \$1.00 for a package of Tonic Heave Remedy which I wish to give to a horse that is out of condition. Last spring I told a friend of mine, Mr. Horsfall, about this remedy. He had the worst case of Heaves I ever saw. Could hardly get the horse out to water. Now he is working it and it never heaves.—C. F. Snelling, Siletz, Oregon.

Builds Them Up

Dear Sirs:—I am sending you an order for one package of your Tonic Heave Remedy. Have used it and find it is just the thing to build up a run-down horse. It enables them to get the nourishment out of food.—J. M. Dickson, Joe, N. C.

Cured The Veterinarian's Horse

Gentlemen:—Several months ago I ordered from you a package of your Tonic Heave Remedy, then later ordered a second package. When I sent you the first order, I had just bought a mare with a very bad case of Heaves, and I wished to try the remedy on this case. I must say that the two packages effected a complete cure.—A. H. Williams, V. S., Bellefontaine, Ohio.

Trebled Her Value

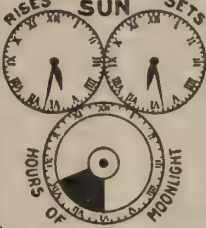

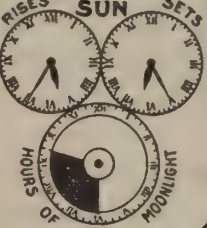

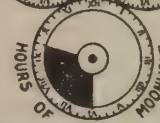

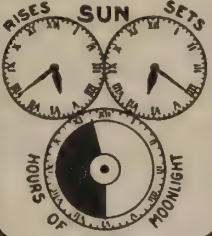

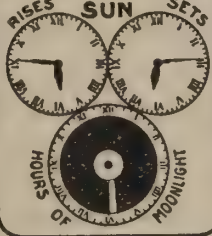

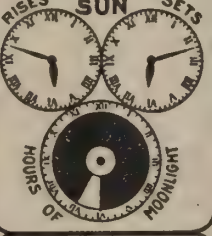

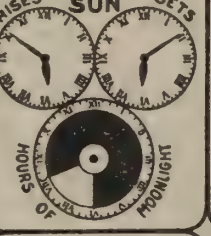

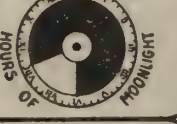

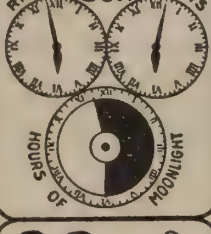

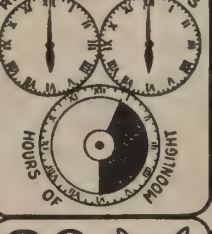

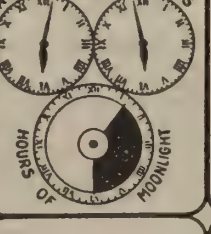

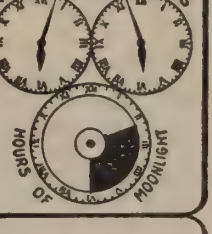

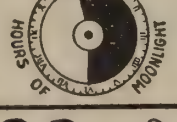

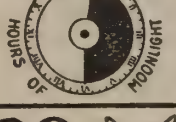

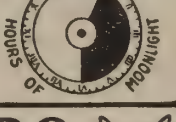

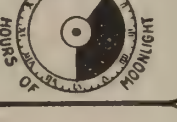

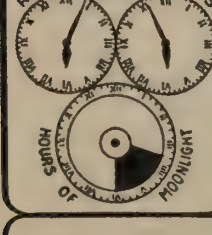

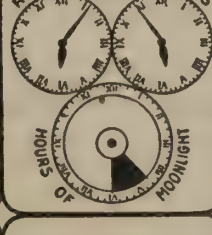

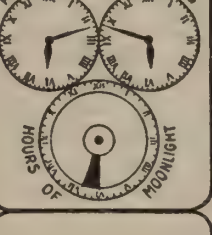

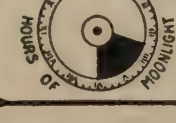

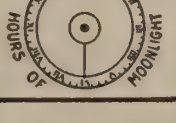

Gentlemen:—About a year ago I sent for your wonderful Tonic Heave Remedy, and I now have the pleasure of telling you what it did for an old mare that I bought for \$25. It built her up so that I now have a standing offer for her of \$80, but I refuse to take it. She was nothing but skin and bone; now she is round and plump and a pic-

ture to look at. A number have asked me what I did for her and I have recommended the remedy to them.—William H. Hand, 51 Halstead Ave., Irvington, N. J.

Worth \$100

Dear Sirs:—I have great faith in your remedies. I ordered a bottle of your Spavin Cure and used it twice on a mule and cured her of Spavin. One of my neighbors had a fine mare that had the Heaves. I told him about your Heave Remedy and he ordered two packages. Yesterday I saw him and asked him how the mare was. He told me that she is as sound as ever and that he would not take \$100 for what the remedy has done. He said that \$200 would not buy the mare today. His name is Joel Jones.—Frank Massa, Baxter, Tenn.

Saved The Horse's Life

Dear Sirs:—I am very grateful to you for what the Tonic Heave Remedy has done. I am confident that it saved the life of my horse that had a very bad case of Heaves.—John Heath, Monmouth, Iowa.

Not a Heave in His Hide

Gentlemen:—Less than two boxes of your Tonic Heave Remedy has cured my horse. He had the Heaves so bad we thought he would die. If we tried to work him when it was a little warm, he would stand with his mouth open as if trying to gasp for breath. He is getting to be a pretty old horse, but I can now work him all day when it is as hot as the weather gets, and you cannot see a heave in his hide. He can do as much as any \$200 horse in our county.—John Murr, R. F. D. No. 6, Celina, Ohio.

Will Never Buy Condition Powders

Gentlemen:—Your Tonic Heave Remedy is the best tonic that I ever gave to a horse. It gives them an appetite and they digest the food well. I shall never buy any more condition powders. I am a rural mail carrier, and my horses have to eat to stand the long drive. This tonic is the finest thing I have ever given them.—Chas. H. Anderson, Brookline Station, Mo.

Nearly Useless

Dear Sirs:—Some time ago I got two packages of your Tonic Heave Remedy for a horse that was nearly useless, and he is now as good as ever so far as the Heaves is concerned. Enclosed find \$2 for a bottle of your Spavin Cure (Liquid). I hope this will prove as good.—H. P. Berry, Livermore Falls, Me.

Doing Great Work

Gentlemen:—Enclosed you will find \$1 for a package of Fleming's Tonic Heave Remedy. This remedy is doing great work here. It has proved a great success wherever used, and has cured cases that veterinarians could not touch. Let the good work go on.—James J. Courneen, Lyons, N. Y.

A Great Tonic

Dear Sirs:—I have handled horses for over forty years and can say that Fleming's Tonic Heave Remedy is a great tonic for a run-down horse. It is ahead of anything else that I have ever used. Enclosed find \$1 for another package.—Emery F. Hewitt, Johnsburg, N. Y.

Not Worth a Dollar

Dear Sirs:—I will drop you a few lines to let you know what your Tonic Heave Remedy has done for my mare. When I began using it, she was so bad that I did not think she would live, and I would not have given a dollar for her if she had not belonged to me, but now I would not sell her for \$50. I think it is a wonderful medicine.—J. W. Tyler, R. F. D. No. 1, Lyles, Tenn.

Fleming's Colic Cure

This remedy can do you no good unless you have it on hand, ready for use when needed.

Colic attacks suddenly and kills quickly.

Fleming's Colic Cure is the surest protection that you can have, and the satisfaction of having it on hand is worth more than the dollar it costs, even if you should never have occasion to use it.

It isn't safe to trust to luck—order now. There are eight doses in the bottle, and it will keep almost indefinitely.

Mailed prepaid for \$1.

See assortment offer on inside of back cover.

Two Bad Cases

Gentlemen:—Enclosed please find money order for one bottle of Fleming's Colic Cure. I had two bad cases of Colic this week. One was Spasmodic and the other Flatulent, and your Colic Cure surely saved the lives of both horses. The Spasmodic case took two doses and the Flatulent case three doses. I must say that they were both very bad. Kindly send at once, as I do not want to be without this remedy.—A. H. Klocke, Woodville Plantation, Crewe, Va.

Strongly Recommends It

Dear Sirs:—Find enclosed post office order for \$2, for which please send me two bottles of your Colic Cure. One of my neighbors stopped at my place yesterday with one of his horses sick with cramp colic. One dose of Fleming's Colic Cure fixed the horse all right in twenty minutes. He left \$1 with me and asked me to order a bottle for him. I can strongly recommend your Colic Cure.—W. W. Weston, Audubon, Iowa.

Cured Every Case

Gentlemen:—I send you herewith \$1 for one bottle of your Colic Cure. I have had several cases of Colic and some very bad ones. Your Colic Cure has cured every case, and I have used but one bottle.—William B. Michael, Aberdeen, Md.

Saved His Neighbor's Horse

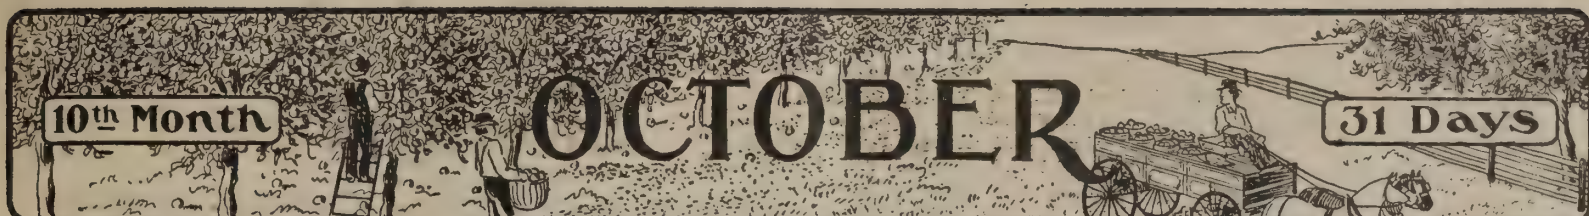

Dear Sirs:—Please find enclosed \$1, for which send me a bottle of your Colic Cure. I saved a horse for my neighbor last night with this remedy. Please send it right away.—Joseph Renalt, R. F. D. No. 3, Hesperia, Mich.

A Rough Reward for Kindness

Gentlemen:—I am going to tell you what your Colic Cure has done. One of my horses was down all day and the people who were with her gave her up for dead. When I got home that night, I saw that she had a very bad case of Colic. I got some of your Colic Cure and gave her one dose. In ten minutes she was on her feet and rewarded me by giving me a glancing kick in the eye.—F. G. Harper, Manager Stevinson Cash Store, Stevinson, Calif.

Did Surprising Work

Gentlemen:—Enclosed find \$2, for which please send to my address two bottles of Fleming's Colic Cure. I have used this medicine on several cases of Colic and must say that it did surprising work. Some of them were very bad, but it relieved them promptly. I have very seldom had to use a second dose.—Joseph F. Long, R. F. D. No. 36, South Hadley, Mass.

Had No Hope

Dear Sirs:—A few days ago your Colic Cure was the means of saving one of my best horses. We had no hope for her at all, when our neighbor, J. S. McAulis, came over and said he had a bottle of your Colic Cure. He got it, and in twenty-five minutes the horse was all right. Enclosed find \$1, for which please send me a bottle of the same remedy.—S. P. McCready, R. F. D. No. 3, New Galilee, Pa.

Hasn't Lost a Horse

Dear Sirs:—Please send me a bottle of Colic Cure for the amount enclosed. I have been depending upon this remedy for a year now, and since I began using it, have not lost a horse.—H. H. Salter, Fairmont, Minn.

Worth Ten Times the Price

Dear Sir:—I used your Colic Cure and found it just as you say. It is worth ten times what you sell it for, and no man who owns horses should be without it.—D. J. Carleton, Standish, Mich.

Horse Was Given Up

Gentlemen:—I saved a good horse for one of my neighbors last week. He had a bad case of Colic, and they had the veterinarian there treating him. I watched them work with him, but on account of the doctor being there I said nothing until they gave him up to die, then told them I would like to give him some of your Colic Cure, and they said, all right. In fifteen minutes after giving him the first dose he was better, and seeing what it did for this horse, two men want me to get some of the remedy for them, so I enclose five dollars for six bottles of the Colic Cure.—Stephen Weaver, R. F. D. No. 2, Edgewood, Ill.

(Continued from page 18)

brought \$36,000.

A peach orchard near Spokane, Wash., yielded a net profit of \$1,000 per acre on a single crop. Near North Yakima in 1907 the peaches from an acre of ground brought \$2,580.

An apple grown in southern Oregon measured 18¾ inches in circumference.

It is not to be supposed that all fruit growers of the Northwest have done as well but the foregoing instances serve to show the possibilities of scientific fruit culture where soil and climatic conditions are ideal and irrigation facilities are adequate.

Increase of National Wealth

According to statistics, during the four years preceding 1908 there was an increase in the value of live stock on the farms of the United States from \$2,989,000,000 to \$4,331,000,000.

A 1 increase in farm products from \$5,917,000,000 to \$7,412,000,000.

An increase in gold production from \$74,000,000 to \$90,000,000.

An increase in coal production from \$314,000,000 to \$420,000,000.

An increase in savings banks accounts from \$2,815,000,000 to \$3,495,000,000 and an increase in all bank deposits from \$9,553,000,000 to \$13,000,000,000.

An increase of 20,000 miles of railways.

An increase in manufactured exports from \$468,000,000 to \$740,000,000.

An increase of 1,000,000 bales of cotton consumed in American factories.

An increase in imports of raw materials used in manufactures from \$330,000,000 to \$447,000,000.

An increase of 2,000,000 spindles in the cotton factories of the nation.

Champion Dairy Cow

A Holstein-Friesian is said to be the champion dairy cow. In one year she produced 27,433 pounds of milk, yielding 998 pounds of butter fat, sufficient to make 1,164 pounds of butter. The average daily

(Continued on page 26)

Fleming's Sweeny Cure

Sweeny is not a trifling ailment to be treated carelessly or neglected altogether.

If fatty degeneration of the muscular tissues sets in, a complete cure may be impossible, even with Fleming's Sweeny Cure.

This is not apt to occur in the recent cases, but neglect leads up to it.

Fleming's Sweeny Cure is made especially for Sweeny and Shoulder Lameness, and possesses a peculiar property all its own. To all appearance it is a mild blister, but it penetrates and does a more important work entirely beneath the surface. It stimulates the tissue-forming processes, so that the wasting of the muscle ceases and the rebuilding begins.

No case requires more than one bottle, and the horse may do slow, easy work on smooth ground while being cured.

Use it whether the case is new or old—your money back if it fails.

Mailed prepaid for \$1.

See assortment offer on inside of back cover.

Thought Horse Should be Killed

Gentlemen:—My father has a mare worth \$300. She had Sweeny so bad that horse doctors said she would have to be killed. He sent to you for a bottle of your Sweeny Cure, and today she is just as well as she ever was.—H. L. Whipple, Lempster, N. H.

One Bottle Cured Eight

Gentlemen:—I have used one bottle of your Sweeny Cure and it does what you say. I have cured eight mules with one bottle of this remedy. I am out of it now. Enclosed you will find \$1 for another bottle.—Almarine Yates, Stacy, Va.

Thought It Incurable

Gentlemen:—The Sweeny Cure I received from you was fine. I had a horse that was sweenied so bad that I had no idea that this remedy or anything else could cure him. Today he is all right. I had treated him in other ways before, but without any result.—W. A. Hefferman, R. F. D. No. 1, Ireton, Iowa.

Made \$45

Gentlemen:—I have tried several of your remedies and have found them good. One case I treated was Sweeny on a mule. I paid \$15 for the mule, cured him with the Sweeny Cure, then sold him for \$60.—D. B. Miles, Darlington, Fla.

Simply Wonderful

Gentlemen:—I have a good horse that is just developing Spavin. Please let me know if you have a remedy that will cure it. I have used your Sweeny Cure, and it is simply wonderful. It cured the worst case of Sweeny that I ever saw.—Leon T. Lane, Mfr. of Rough and Dressed Lumber, Ore Hill, N. C.

Cured Effects of Azoturia

Dear Sirs:—About a year ago I got a bottle each of your Sweeny Cure and Colic Cure, and used both with good success. Two applications of the Sweeny Cure took the stiffness and rigidity from the flank of a mare that had had Azoturia the fall before. At the same time I ordered, I got a bottle

of the Sweeny Cure for a friend. He cured a horse that was badly sweenied and has enough left for several others.—E. R. Allen, Tangent, Ore.

Had Given Him Up

Gentlemen:—My father had a colt that was hurt in the shoulder. We do not know how it happened, but when we found him his right shoulder was badly swollen and he could not step on that leg at all. We had an experienced veterinarian look at him and he gave us some medicine, but it did very little good. The swelling went away, but the shoulder became very badly sweenied. The colt got so he could step on the foot, but he would swing the leg to one side when he took a step, and when he was standing he would not put any weight on it at all. We had the veterinarian again, but he did the colt no good. That was two years ago, when he was two years old. We had given him up entirely until last March when I got one of your books, and we thought we would try your Sweeny Cure. With three applications of it, the colt was cured and we now work him every day. We consider that your medicine worked a wonder.—Jacob Bickelhaupt, R. F. D. No. 2, Scranton, Iowa.

Fleming's Knee-Sprung Cure

We recommend this remedy in a conservative way only, advising that it be used only in cases of recent origin and upon animals not advanced in years. In favorable cases such as these, it has proved to be a satisfactory treatment.

Some cases of Knee-Sprung are hereditary, existing from colthood up, and these may safely be regarded as incurable.

Most cases are due to sprain or other injury, or to some over-exertion or continued hard usage, causing the back tendons of the leg to become contracted. Treat cases of this kind, except those of long standing, those due to some severe injury that lacerated the tendon, and those in which the animal is old and stove up. The best time to treat is when the knees are first observed to be weak and shaky.

Fleming's Knee-Sprung Cure has a relaxing effect upon the contracted tendons and cures permanently. It does not blister or interfere with working the horse, though of course fast work or heavy exertion should be avoided.

The improvement is necessarily gradual, and the time required to cure varies in different cases. Sometimes a single bottle of the remedy is sufficient, but the average quantity required for recent and moderate cases is about two bottles.

We refund the money if satisfactory results are not obtained, thus giving the customer the safe side.

Per bottle, \$3. See assortment offer on inside of back cover.

Sent prepaid on receipt of amount.

Will Do The Work

Dear Sirs:—Enclosed you will find order for a bottle of your Eye Lotion. I wish also to say that I had success with your Knee-Sprung Cure. It is a remedy that will do the work.—J. B. Zimmerly, Dudley, Ill.

Cured Several Cases

Gentlemen:—Find enclosed \$5 for two bottles of Fleming's Knee-Sprung Cure. I have great faith in its merits, as I have now cured several cases of sprung knees with it.—J. C. Welch, Ridgeville, S. C.

Cured Completely

Dear Sirs:—A few months ago I ordered some of your Knee-Sprung Cure and have used it on a very fine blooded four-year-old colt with good results. The knee is completely well now, but I wish to ask if riding under the saddle would have any tendency to bring back the old trouble. The colt is an exceptionally fine pacer.—W. B. Hester, Emmlenton, Pa.

People Said, No Use

Gentlemen:—I thought it no more than right that I should tell you something about my horse, even at this late date. You will remember me as the man who was treating a horse with your Knee-Sprung Cure. People said there was no use in treating him, and that there was no medicine in existence that would do him any good, but after reading your circulars I concluded to try it. I now have one leg as straight as any horse's leg, and the other leg has straightened up wonderfully. I stopped using the remedy because owing to existing circumstances I was unable to give the horse any further attention whatever, but he has been benefited wonderfully. Now one of my neighbors who has seen the effect of the Knee-Sprung Cure on my horse wants to try a package of your Tonic Heave Remedy, and enclosed you will find one dollar for it. I thank you for what you have done for me, and wish you every success.—W. G. Hunt, R. F. D. 1, Pleasant Mills, Ind.

(Continued from page 24)

production of milk was nearly 36 quarts.

A Jersey cow produced in one year 13,205 pounds of milk, yielding 815 pounds of butter fat, sufficient to make 960 pounds of butter. Though the Jersey gave less than half as much milk as the Holstein, it was much richer in butter fat, the average content being 6.29 per cent., against the Holstein's 3.64 per cent.

What Milk is Composed of

One hundred pounds of fresh milk of good quality consists of 87 pounds water, 4 pounds butter fat, 5 pounds milk sugar, 3.3 pounds casein and albumen, and .7 of a pound of mineral salts. The proportions vary with different cows, and with the same cow at different times in the period of lactation. All the substances except the water are of food value. The butter fat is in minute globules, so small that about two thousand of even the larger ones could be placed side by side in a line within the space of one inch. When milk stands, these globules, being lighter than the water, rise to the surface and constitute a high percentage of what we call cream. In the process of churning the small globules of butter fat become united, forming butter. The greater part of the other substances remains in the milk, and in the process of souring, which is due to the action of bacteria, the milk sugar is changed into lactic acid.

To Compute the Weight of Cattle

Multiply the girth in inches immediately back of the shoulders, by the length in inches from the square of the buttock to the point of the shoulder blade, and divide the product by 44, which will give the number of superficial feet. If the animal has a girth of from 3 to 5 feet, multiply the number of superficial feet by 16, which will give the weight of the animal. If the girth is from 5 to 7

feet, multiply by 23, and if from 7 to 9 feet, multiply by 31. If less than three feet girth, as in the case of small calves, hogs, sheep, etc., multiply by 11. Of course many circumstances, such as the build of the animal, mode of fattening, condition, breed, etc., will influence the weight, but the above will be found approximately correct.

Estimating Hay in Mow, Stack or Load

To find the number of tons of hay in a mow, multiply the length, height and width in yards, and divide by 15, if the hay is well packed. If the mow be shallow and the hay recently placed therein, divide by 18, or by any number from 15 to 18, according as the hay is well packed.

To find the number of tons of hay in square or long stacks, multiply the length of the base in yards by the width in yards, and that by half the height in yards, and divide by 15.

To find the number of tons of hay in a load, multiply together the length, width and height in yards, and divide the product by 20.

Estimating Grain in Bins

To measure grain in bins, multiply the length of the bin in inches by the width in inches, and that by the height in inches, and divide by 2,150 for struck bushels, and by 2,748 for heaped bushels. The quotient will be the number of bushels contained in the bin.

Estimating Corn in Crib

To measure corn in a crib, multiply the length of the crib in inches by the width in inches, and that by the height of the corn in the crib in inches, and divide the product by 2,748, and the quotient will be the number of heaped bushels of ears. If the crib flares at the sides, measure the width at the top and also at the bottom, add the two together, and divide by two, which will give the mean width.

Skim Milk Paint

Into one gallon of sweet skim milk stir three or four pounds of the best Portland cement. Add Venetian red or other dry pigment sufficient to bring it to the desired color. Mix only a gallon at a time, as it is not good after standing too long. The mixture must be kept well stirred, as the cement tends to settle to the bottom. This paint looks well and its durability is surprising. It is an excellent paint for sheds, barns, poultry houses, fences, etc., and the cost is next to nothing.

To Keep Water Cold

Place between two sheets of thick brown paper a layer of cotton batting about half an inch in thickness; fasten the ends of the paper and batting together, forming a cylinder, then sew or paste a crown over one end, making a box the shape of a stove-pipe hat minus the rim. Place this over an ordinary pitcher filled with ice water, making it deep enough to rest on the table so as to exclude the air, and you will be astonished to see the length of time that the ice will keep and the water remain cold after all the ice has melted.

Preserving Eggs in Salt

Cover the bottom of a keg, cask, jar or any other receptacle you choose to pack in, with a layer of fine salt two inches deep. Upon this place the eggs, small end down, and far enough apart so that they will not touch each other or the sides of the receptacle; then put on another two-inch layer of salt, then another layer of eggs, and so on until the package is full. This is probably the best method for housekeepers and for those who have only a small number to pack for market. The salt can be used over and over again.

(Continued on page 29)

Fleming's Veterinary Eye Lotion

This remedy is for every eye ailment of animals that is marked by inflammation and soreness.

It will not restore sight in a case of blindness, nor will it improve the sight in partial blindness if the eye structure itself has been impaired by injury or disease.

For Moon Blindness of horses there is nothing better to relieve the inflammation and protect the sight, and it will often ward off the recurring attacks, though we cannot promise a complete and permanent cure of this disease. (See Moon Blindness in Fleming's Vest-Pocket Veterinary Adviser.)

For all weak, watery, swollen, sore and inflamed eyes among your stock, use Fleming's Veterinary Eye Lotion—your money returned if you are not satisfied.

Mailed prepaid for 50 cents.

See assortment offer on inside of back cover.

One Eye Blind

Gentlemen:—I sent to you last summer and got a bottle of your Veterinary Eye Lotion, and it was surely fine. My horse was entirely blind in one eye, but before I had used it a week he could see some, and in a little time the eye was all right. I did not use all that was in the bottle and think that I quit too soon, and that it was not entirely cured. As his eye shows signs of becoming weak again, I will try another bottle. Enclosed find 50 cents, for which mail a bottle to me.—C. E. Eggerman, R. F. D. No. 3, Lexington, Okla.

Has Cured a Number

Dear Sirs:—Enclosed find 50 cents, for which please send us another bottle of your Eye Lotion. It gives the very best of results. We have cured a number of bad eyes with it.—Milliken Bros., R. F. D. No. 2, Hudson, Mich.

No Equal for Weak Eyes

Dear Sirs:—I have used one bottle of your Eye Lotion and find it has no equal for weak-eyed horses.—Paul D. Bishop, Lodge, S. C.

Moon Blindness

Dear Sirs:—About a year ago I had a horse that got Moon Blindness. I sent for a bottle of your Veterinary Eye Lotion, which I used, and today the horse is entirely cured. I can fully recommend it.—Thomas Hansen, R. F. D. No. 2, Valley Springs, S. Dak.

Thought the Horse Would Go Blind

Dear Sirs:—I wish to thank you for the good I received from your Veterinary Eye Lotion which I got five months ago. The horse's eyes had been bad for a long time and I began to think her sight would be gone, and all our neighbors thought the same way about it. It was impossible for her to hold her eyes open, but in one week after I began using the remedy her eyes were as strong and bright as ever.—Ed. Comp, R. F. D. No. 1, Edon, Ohio.

Thought It Was Moon Blindness

Gentlemen:—Your Veterinary Eye Lotion cured my horse when a veterinarian called the trouble Moon Blindness. I was sure it was not that disease and persisted in using the remedy, which effected a cure.—A. W. Willcox, Plymouth, N. Y.

Sore Four Months

Dear Sirs:—About a month ago I received Fleming's Eye Lotion and just mixed half of a fifty-cent bottle in one pint of water and began to use it. From the first I could notice improvement. The eye had been running for four months and I had used all kinds of drugs and powders before I got your Lotion. I haven't used it for a week now and don't think I will have to use any more, as the eye seems all right. That half bottle I used was worth \$10 to me.—Chas. Parks, Evans City, Pa.

Eyes Sore Two Years

Dear Sirs:—I have had good success with your Eye Lotion. My mare's eyes were sore for two years and I tried everything I could hear of without doing them any good, until I heard of your great remedy and tried it, and in two weeks the mare's eyes were entirely well.—Will Gray, Winchester, Tenn.

(Continued from page 28)

Keeping Eggs Fresh for Home Use

The following recipe is given for keeping eggs not intended for market. Put them in an open-work basket or colander and immerse them for a moment in boiling water; let them stay just long enough to form a film on the inside of the shell; this excludes the air. Then place them in some convenient vessel, small end down, and set them in the coolest part of the cellar, where they will keep until wanted for use.

Total	9,007,625	17,655,991	9,232,754

The nine million head of cattle received during 1907 at the six markets would, if placed in single file, make a line extending more than half way around the world at the equator, or approximately fifteen thousand miles in length.

Fleming's Veterinary Healing Oil

People generally are too careless in the treatment of small wounds.

They are apt to apply whatever is handiest, and consider it good enough.

But it doesn't take much of a wire cut to ruin a horse sometimes, if treated carelessly in this way or neglected altogether.

Fleming's Veterinary Healing Oil is a product of the same chemical skill that produced Fleming's other remedies, and, like the others, it is a wonder in the work it does.

Use it for cuts, galls, old sores, burns and everything that ought to heal.

Order now so that you will have it—you are sure to have use for it some time.

Mailed prepaid for 50 cents.

See assortment offer on inside of back cover.

Helped Earn \$20

Dear Sirs:—I used your Healing Oil on a horse that was all but burned up, and every one who saw her said that she would die. When I had used two bottles, her owner handed me \$20 for curing her. Today she is working on a coal wagon and looks fine. There is not a place that you can see any sign of her having been burned.—J. Leslie Lambert, R. F. D. No. 1, Plainfield, N. J.

Best For Wire Cuts

Gentlemen:—Please send by return mail one bottle of your Veterinary Healing Oil, for which I enclose 50 cents in stamps. I have used one bottle and find it the best preparation for wire cuts that I have ever used.—R. W. Garman, R. F. D. No. 1, Courtland, Kansas.

Doctor Couldn't Heal It

Gentlemen:—We had a mule to get his foot cut last August on a 40-penny nail. After trying all the healing remedies we could think of and getting no results, we turned him over to a veterinarian of our city. He kept him about three weeks and did not do him any good. We then brought him home and wrote you to send us something if you had anything that would do it any good. You sent two bottles of your Veterinary Healing Oil. We used it according to instructions, and the mule is now sound and well. We could not say too much for it.—Imperial Grocery Company, Dyersburg, Tenn.

Best Thing on the Ranch

Dear Sirs:—The Veterinary Healing Oil that you sent us is the best thing we have ever had on the ranch. Enclosed find 50 cents for another bottle. We have used it on sores and cuts of various kinds. We have also used your Lump Jaw Cure and find it all right.—Spurlock Bros., Riverside, Oregon.

This Shows Its Worth

Gentlemen:—I have a horse that was cut by barbed wire last October. It didn't heal right and has left a raised place. What can I do to reduce it? He was cut just above the hoof on the outside of the left fore foot. He is a little lame, and it looks as though his hoof were growing off and another growing on. I have two others that were cut in just the same way, but used your Healing Oil on them. They healed promptly and left no raised place, but on the one that is in bad shape I didn't use your remedy.—R. R. Ellison, Marfa, Texas.

Fleming's Chemical Hornstop

Just clip the hair off the horn button and stick on a little piece of Fleming's Chemical Hornstop.

It is a pasty substance and will stay where you put it.

Do this when the calf is three to ten days old and there will be no horns to saw off later.

The calf scarcely minds it at all, for it causes but little soreness.

Put up in collapsible tubes, each sufficient for twenty-five to fifty calves, but the preparation will not keep from year to year.

Money back if it doesn't stop the horns.

Mailed prepaid for 50 cents.

See assortment offer on inside of back cover.

Calves Proud of the Job

Dear Sirs:—Here I come again, and the reason I come is that I have faith in you and all of your remedies. I have had cause to use a lot of them and no kick coming, though I admit being a kicker. All of your remedies that I have tried have given the best of satisfaction. Have noticed in the Michigan Farmer one person's method of dehorning calves, the old caustic remedy. That used to be my way when I knew no better—throw the calf, shave the hair off and get caustic all over the calf's head and over myself, then have ugly little stubby horns after all. I was always ashamed of the calves, and the calves always eyed me with distrust, and I could see they had lost all confidence in me. Now I cut the hair off, and when the calf is drinking, approach it with all kindness, take your little tube, squeeze a piece of Hornstop the size of a pea on my finger and press it on the spot. That does the business, and the calf and I are friends. There are no stubby horns, but instead a nice, smooth head. I have often seen the calves standing in a pool of water looking at their reflection and admiring the job.—R. Alexander, Fowlerville, Mich.

Leaves the Head Smooth

Gentlemen:—Enclosed find 50 cents, for which please send me one tube of Fleming's Chemical Hornstop. I have used this preparation for the past three years and am very well satisfied with it. It leaves the head just as smooth as any of the polled breeds of cattle. I can cheerfully recommend it to any one as a first-class preparation for polling calves.—C. F. Adams, Mt. Sterling, Wis.

Stops Them Every Time

Gentlemen:—I am a breeder of pure-bred and high-grade Hereford cattle, and I used your Hornstop on my calves last season. Will say that it is just as you recommend it and is easy to use. It will stop them every time if properly applied.—J. D. McCune, Sheffield, Ill.

No Signs of Horns

Gentlemen:—I got one tube of your Hornstop and dehorned thirteen calves with it. There isn't one of them that has any sign of horns. It is the best I ever used.—J. G. Benda, Brooklyn, Iowa.

All His Cattle Hornless

Gentlemen:—Enclosed find fifty cents, for which please send me another tube of your Chemical Hornstop. We owe it to your Hornstop that all of our cattle are hornless.—Homer M. Street, Sisters, Oregon.

Gentlemen:—I am a veterinary surgeon of forty years' practice, and I take pleasure in recommending your remedies to the general public. I have a large practice here, and have had occasion to use all of your preparations. Your Heave Remedy has given good results in many cases, also the Colic Cure. Have also had marked success with your Lump Jaw Cure, Fistula and Poll Evil Cure, and both of your Spavin remedies.

DR. HENRY HOPKINS, V. S.,
301 Ferry St., Eugene, Oregon.

These Ought to be in Every Stable All the Time

Fleming's Colic Cure

An order for Fleming's Colic Cure makes us think, "There is a prudent man."

We know that it is not ordered to treat a horse that has colic at the time, but that it is ordered as a precaution and a means of protection against colic loss, much as one insures his buildings against possible loss by fire.

We know, too, that his having the remedy on hand affords a measure of security to his whole neighborhood, for it puts him in position to be of valuable service to any neighbor who may have a horse attacked.

Read the testimonials about the Colic Cure. They will make plain to you the good work that the remedy does, and will show how often it enables a man to do a neighbor a good turn.

A million bottles of Fleming's Colic Cure ought to be sold every year. It is good enough to deserve so large a sale, and the annual colic loss is great enough to justify every horse owner in buying a bottle.

Colic comes unexpectedly and does its work quickly. Safety lies in being prepared for it.

Include this remedy when you order; or, if you need nothing else, order the Colic Cure alone. The satisfaction of having it on hand is worth more than the dollar it costs.

Fleming's Veterinary Healing Oil

Accidents will occur.

Even if you have no barbed wire on your farm, there is sure to come a time when you ought to have Fleming's Veterinary Healing Oil.

No matter how slight a wound may be, lack of proper treatment may make a bad case of it.

We do not believe there is any other general healing remedy so good.

Order a bottle so that you will have it when you need it.

Fleming's Tonic Heave Remedy

A horse does not need to have heaves in order to need Fleming's Tonic Heave Remedy.

It is used for other disorders fully as much as it is for heaves.

There is nothing in it especially for heaves, or that has specific action upon the respiratory organs.

It is simply a tonic and blood purifier for horses.

A tonic is a medicine that tends to correct functional laxity—that tones up the vital processes by which life and health are maintained.

Fleming's Tonic Heave Remedy, being both a tonic and blood purifier, not only tends to restore normal digestive processes, but at the same time impurities are eliminated from the blood so that it may receive, carry and distribute the nourishing elements derived from the food.

With this accomplished, each organ is made strong and active for the work it has to do, and the result is that state of functional harmony that we call health.

It is by this process that Fleming's Tonic Heave Remedy cures heaves, and you may readily understand that it should be just as good for any other ailment requiring a tonic and blood-purifying treatment.

Use it for horses that are lean, run down or lacking in strength or spirit, also for horses with failing appetite, or for those that have the appetite but remain thin and weak in spite of care and feeding.

For hide-bound, rough coat, scurfy skin, skin eruptions, etc., we know of nothing that equals it.

Many horses need a tonic and blood remedy in the spring at shedding time. Fleming's Tonic Heave Remedy is excellent to tone up such a horse and put him in shape for spring work.

It is economical to use because it helps quickly and a package goes so far, and we will send your money back if you are not satisfied.

ORDER BLANK

Any Six-Dollar Assortment for Five Dollars

Two bottles of the Knee-Sprung Cure, or three bottles of any of the two-dollar remedies, or any kind of an assortment amounting to **Six Dollars** as per prices quoted below, will be supplied for **Five Dollars**.

To secure this reduction the remedies must be ordered from us direct, and **the entire six-dollar lot must be ordered at one time.**

Orders are filled promptly, the remedies being sent by mail in special safety mailing cases, and safe delivery is guaranteed.

Our Way of Selling

Fleming's Remedies are not very generally sold in drug stores. The reason is because our leading remedies are specialties for which there is comparatively little demand in any one locality.

For instance, outside a few of the best cattle sections, there may be entire counties in which there are not half a dozen cases of Lump Jaw in a whole year. In the same county there may be anywhere from half a dozen to a hundred or more drug stores, and these druggists could not afford to keep Fleming's Lump Jaw Cure upon their shelves for the sake of supplying so limited a demand. It is just the same with Fistula and Poll Evil, and some of the other diseases we treat.

Therefore, our method of doing business is to deal directly with each customer. Orders are received by mail, and the remedies are sent by mail or express, charges prepaid and safe delivery guaranteed. In this way the scattering business is gathered together, the freshness of the remedies is assured, the customer is protected against imitations, and we are placed in a position to offer special advice when required.

This has been our way of selling since we first began business in 1896, and it has proved satisfactory in all respects, to our customers and to ourselves.

Fleming's Guarantee

Our guarantee is brief and clearly defined. It cannot possibly have more than the one meaning, and is just the kind of a guarantee that any honest business house should want to give to an honest customer.

If any one of Fleming's Remedies doesn't do what we say it will do, we will refund to you its price, you to be the judge and your word to go.

Any Six-Dollar Assortment for Five Dollars

Two bottles of Knee-Sprung Cure, or three bottles of any of the two-dollar remedies, or any kind of an assortment amounting to Six Dollars at the prices quoted, will be supplied for Five Dollars.

To secure this reduction the remedies must be ordered direct from us, and the entire six-dollar lot must be ordered at one time.

Price List of Fleming's Remedies

Fleming's Remedies are sent by mail, postage prepaid, on receipt of price, and safe delivery is guaranteed. Full directions are in every package. Remittances are always safe when made by Post Office or Express Money Order, or by Registered Letter. See Assortment Offer at bottom of this page.

Fleming's Lump Jaw Cure.....\$2.00

More than one bottle is seldom needed for a case, and as a general rule less than a bottle is sufficient.

Fleming's Spavin Cure (Liquid).....\$2.00

One bottle is usually sufficient for several cases. No case needs more than a bottle.

Fleming's Spavin and Ringbone Paste.. \$2.00

Used only upon well-developed cases of Bone Spavin, Ringbone and Sidebone causing marked lameness. One bottle is always enough for a case, and usually enough for several.

Fleming's Fistula and Poll Evil Cure..\$2.00

Most cases are cured with one bottle or less. An exceptionally obstinate case may need as much as three bottles, but such instances are rare.

Fleming's Knee-Sprung Cure.....3.00

Should be used at the start of the trouble. The average quantity needed is about two bottles.

Fleming's Tonic Heave Remedy.....\$1.00

The average quantity for a case of Heaves is about two packages. Some are cured with one, while others require three.

Fleming's Sweeny Cure.....\$1.00

No case needs more than one bottle. Most cases are cured with much less.

Fleming's Colic Cure.....\$1.00

Quantity needed for a case, one to three doses. Bottle contains eight doses.

Fleming's Veterinary Healing Oil..... 50c

Quantity needed depends upon what you are using it for. It is applied lightly and a bottle goes a long way.

Fleming's Veterinary Eye Lotion 50c

Each bottle, when diluted with water, makes a quart of Lotion right strength to use.

Fleming's Chemical Hornstop..... 50c

Each tube sufficient for 25 to 50 calves. This preparation will not keep from year to year.

Fleming's Fistula Syringe..... 50c

Capacity of syringe, one-eighth ounce; length of nozzle or pipe, three inches.

Extra Nozzles for Fistula Syringe, each 20c

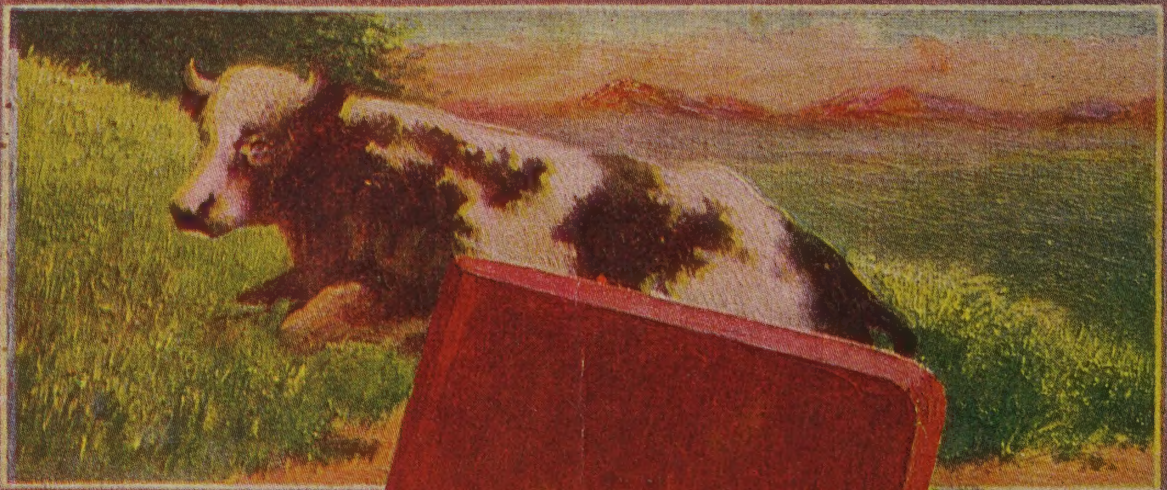

We do not supply half sizes of any of our remedies.
